This is a story of George Henry Nolan spanning four decades between 1920 and 1960 His eldest brother Joe had controlled the family purse strings and lost his fathers fortune amassed on the diamond diggings in South Africa to the smooth operators on the Bikita Tinfields in 1932 George chose to go it alone His story is also the tale of the many colourful characters he met along the road from wattle and daub to Lithium Lodge Life in the mining camps and Jo burg slums in the

early days was tough but at times both hilarious and tragic Prospecting in unexplored wild malaria infested country a health risk His struggle with the incompetence and prejudice of the Ministry were endless In the fifties he proved the economic value of the worlds largest petalite deposit He then had to deal with the chicanery of the metal brokers the lithium corporations and mining magnates George had to learn fast the complicated art to straddle the ropes of big business *Sex, Drugs, and Sea Slime* Ellen Prager,2024-05-31 When viewed from a quiet beach the ocean with its rolling waves and vast expanse can seem calm even serene But hidden beneath the sea s waves are a staggering abundance and variety of active creatures engaged in the never ending struggles of life to reproduce to eat and to avoid being eaten With *Sex Drugs and Sea Slime* marine scientist Ellen Prager takes us deep into the sea to introduce an astonishing cast of fascinating and bizarre creatures that make the salty depths their home From the tiny but voracious arrow worms whose rapacious ways may lead to death by overeating to the lobsters that battle rivals or seduce mates with their urine to the sea s masters of disguise the octopuses Prager not only brings to life the ocean s strange creatures but also reveals the ways they interact as predators prey or potential mates And while these animals make for some jaw dropping stories witness the sea cucumber which ejects its own intestines to confuse predators or the hagfish that ties itself into a knot to keep from suffocating in its own slime there s far more to Prager s account than her ever entertaining anecdotes again and again she illustrates the crucial connections between life in the ocean and humankind in everything from our food supply to our economy and in drug discovery biomedical research and popular culture Written with a diver s love of the ocean a novelist s skill at storytelling and a scientist s deep knowledge *Sex Drugs and Sea Slime* enchants as it educates enthralling us with the wealth of life in the sea and reminding us of the need to protect it **Sustainable Seas Expedition to the Florida Keys National Marine Sanctuary, September 1-23, 2000** ,2000

**Lightbearer** John Caruso,2009-12-01 Lucifer fallen angel or martyr of desire Condemned to die by God and branded a traitor by his fellow fallen angels Lucifer descends on Boston in a blizzard He is drawn to humanity and vows to appear before the world again as Lucifer But with Heaven s longstanding disinformation campaign stacked against him he does not yet dare When he learns of a celibate cult the Wise Virgins he dons human disguises and enters the lives of two of its leaders Virgil Caldera and his aunt Agatha Brimsmead The powerful archangel Michael Lucifer s creator and former lover is behind the cult Michael is convinced that sex is the source of all misery on earth and has decreed that humans must renounce erotic love or burn in hellfire The battle of wills and wits is on not only over the bodies and souls of Virgil and Agatha but in that age old struggle between desire and divine authority Lucifer has one hope of defeating Michael he must expose the deadly flaw in Michael s plan of salvation But as long as he remains hidden he cannot reveal the truth about his past in heaven or the scandal of the world to come In *The Bible* and *Milton s Paradise Lost* Lucifer is portrayed as the angel whose pride caused him to fall from heaven and turn toward evil In *Lightbearer* he is the artist the dissident and the genius of desire who dares to question the premise of creation itself and who reveals that sin

Gulf of Mexico Joseph C. Britton, Brian Morton, 2014-01-07 To the casual visitor the Gulf of Mexico shores offer mainly sun  
sand and sea Even the standard field guides focused on one group of animals or plants barely hint at the wealth and diversity  
of habitats and species along Gulf shores Shore Ecology of the Gulf of Mexico using a whole habitat approach breaks new  
ground in describing all the conspicuous vascular plants algae birds mammals mollusks crustaceans and other invertebrates  
for each marine habitat The area covered begins west of the Mississippi delta in Louisiana and follows the shores west and  
south to the Yucatan Peninsula in Mexico Transitions between habitats also receive detailed treatment The authors discuss  
changes in flora and fauna that result from differences in climate shore geology and patterns of precipitation in the  
succeeding habitats along the Gulf rim They include discussion of more than 1 000 species of plants and animals both on  
shore and in the near shore subtidal zone to give a virtually complete picture of western Gulf coast ecosystems Excellent line  
drawings and photographs of over 800 species complement the text For marine scientists students and knowledgeable  
beachcombers this is a thorough source on Gulf coast marine life      *Geological Survey Professional Paper* ,1954      U.S.
