

Dependent Equations: Plug and Solve **NOT**

Read about each situation. Decide whether each problem requires you to **substitute** or **plug and solve**. Write the strategy below. Show the steps that lead to your answer.

1. Paper

A piece of paper is rectangular in shape. It is 10 inches longer than it is wide. The perimeter of the paper is 50 inches. How long is the paper?

$$P = 2L + 2W$$

- a. Determine the perimeter of the paper after 2 years.

$$P(2) = 2(10) + 2(20) = 60$$

- b. How long and wide is the paper in the situation above? (If there is more than one answer, list them all.)

$$\begin{aligned} L &= 10 \\ W &= 20 \\ P &= 50 \end{aligned}$$

2. Garden System

There is a new garden system that costs less to install than the old system. The old system costs \$1000 to install. The new system costs \$800 to install. How much more does the new system cost to install?

$$C(2) = 800 - 1000 = -200$$

- a. How many months will it take before the price of the garden system falls to \$500?

$$\begin{aligned} C(t) &= 800 - 20t \\ 500 &= 800 - 20t \\ 20t &= 300 \\ t &= 15 \end{aligned}$$

$$C(15) = 800 - 20(15) = 500$$

- b. What was the cost of the garden system after 2 years?

$$C(2) = 800 - 20(2) = 760$$

3. Investment

The formula $P(t) = 1000(1.05)^t$ gives the value of an investment after t years.

- a. How much was invested initially?

$$P(0) = 1000(1.05)^0 = 1000$$

- b. How much would be in the account after 2 years, and 5 years?

$$P(2) = 1000(1.05)^2 = 1102.50$$

- c. How long would it take for the investment to reach a value of \$1500?

4. Population

According to the Census Bureau, the population of the United States in 2000 was 281 million. The population of the United States in 2010 was 309 million. How much more people lived in the United States in 2010 than in 2000?

$$P(2010) - P(2000) = 309 - 281 = 28 \text{ million}$$

- a. How many times did the population grow?

$$309 / 281 \approx 1.1$$

- b. How long did it take for the population to reach 300 million?

$$P(t) = 281 + 28t = 300$$

- c. How long will the population after 20

Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i.e. teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1.1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans Algebra 1, 2003 Jacaranda Maths Quest 12 Specialist Mathematics Units 3 & 4 for Queensland, 2e learnON and Print Catherine Smith, Paul
