Changing Attitudes and Behavior John Jensen, 2012-07-23 Changing Attitudes and Behavior Practice Makes Permanent the second of the Practice Makes Permanent series argues that school performance is directly correlated to student motivation If school administrators and teachers adopt Jensen's easy direct and effective ways to help students manage their feelings and focus their attention the results will be two fold schools will foster a cooperative and high performing learning community and students will succeed academically while also mastering important social skills To do so both schools and students must make permanent learning their first priority rather than temporary superficial knowledge so that students can take pride in and ownership of their achievements in the classroom Maintaining this standard will require educators to build learning activities systematically they must understand record organize and deepen knowledge It will also require that they know simple and direct ways to change and improve the thinking that drives students behavior in addition to the points of leverage available to teachers when redirecting even the most distracted or distracting students Although identifying and modifying behavior patterns can be difficult Jensen provides tried methods that will address student motivation unify class instruction and get teachers and students back on track for their long term permanent learning goals For more information about the author's work please check out his educational blog here <http://johnjensen.edublogs.org>

Some Developments in Research in Science and Mathematics in Sub-Saharan Africa Lorna Holtman, 2008

Much attention in late developing countries is given to providing access to studies which allow school leavers to enter science and technology related careers. These programmes are driven by the belief that graduates will then substantially contribute to the developmental needs of their countries. But is providing access to institutions enough? Students in developing countries often come from school environments lacking in resources: human, physical and financial. This book in a number of chapters reviews research related to the crucial dimension of epistemological access to the disciplines of import which students need as much as institutional access in order to improve their chances of success. A significant feature of this collection's research studies is that their empirical bases are highly localised, covering areas such as research methods, access, curriculum, instruction and assessment, and the relevance of science and mathematics education in Zimbabwe, Uganda, Swaziland, South Africa, Namibia, Malawi, Ghana and Lesotho. This volume provides invaluable insights and will be of relevance to researchers, policy makers and lecturers interested in these research outcomes in Sub-Saharan Africa. It is the outcome of a doctoral research capacity development project, the Graduate Studies in Science, Mathematics and Technology Education GRASSMATE.

Engineering Student Survival Guide (BEST Series) Krista Donaldson, 2004-04-29. The third edition of this wildly successful text provides information and strategies for engineering students to get the most out of their college education. From freshman orientation to senior year and beyond, this book covers topics pertinent and unique to all engineering students.

Critical Thinking in Nursing Rosalinda Alfaro-LeFevre, 1999. Updated and revised, the second edition of this unique and popular text promotes the critical thinking and professional skills needed to face the challenges of today's rapidly changing health care system. Readers learn both skills and theory in a manner that is practical and easy to read. A completely new chapter provides clinical guidelines for mastering the workplace skills suggested by National Educational Goals 2000. And a wealth of examples, analogies, case studies and practice sessions provide readers with a truly interactive experience. These practice scenarios illustrate real world challenges such as communicating bad news, working in teams, managing conflict and satisfying customers.

Effective Classroom Turnaround John Jensen, 2012-08-31. Effective Classroom Turnaround Practice Makes Permanent, the third book in the Practices Makes Permanent series, contends that because students learn and behave differently, educators must thoughtfully approach them in the classroom in order to affect change. Like all humans, students respond to conditions around them. Regardless of their habits and behaviors at home or in school, educators can successfully stimulate them to approach education in a new, more positive light. Effective Classroom Turnaround offers teachers over fifty ways to generate cooperation, enthusiasm and consistent academic success by utilizing principles of learning and motivation that are often ignored or at best underused, even in the best schools. Embracing the idea that school reform occurs in the classroom and not in the boardroom, this guide will effectively connect instruction with students' motivation and performance.
