**Worlds of Unfreedom** Roquinaldo Ferreira,2025-07-08 An African centered account of the protracted battle to end the slave trade connecting local and global histories In Worlds of Unfreedom Roquinaldo Ferreira recasts West Central Africa as a key battleground in the struggle to abolish the transatlantic slave trade between the 1830s and the 1860s Ferreira foregrounds the experiences and agency of enslaved Africans challenging Eurocentric narratives that marginalize African participation in abolition efforts Drawing on extensive archival research across multiple continents he shows how enslaved people actively resisted the oppressive systems that sought to commodify their lives Doing so he integrates microhistorical analysis with broader world history exploring individual trajectories to unravel complex global phenomena Worlds of Unfreedom bridges a crucial gap by connecting Atlantic and Indian Ocean histories revealing how abolitionist measures often camouflaged new forms of labor exploitation and forced migration under emerging colonial regimes Ferreira s analysis spans the globe from Luanda the kingdom of Kongo and the Lunda Empire to Havana Rio de Janeiro New York City and R union Island He examines the South Atlantic as a space where politics and race making were deeply intertwined with ideas and identities crossing and recrossing the ocean He considers Portugal s strategic use of abolition efforts for territorial expansion its impact on the kingdom of Kongo and the intricate networks linking West Central Africa to Cuba and Brazil With Worlds of Unfreedom Ferreira shows how multiple actors including Africans built anti slave trade politics from the margins His nuanced Africa centered perspective on abolition highlights the resilience and contributions of enslaved Africans in shaping the course of history

**A Cultural History of Western Empires in the Age of Empire** Kirsten McKenzie,2021-07-01 Between 1800 and 1920 the territory and influence claimed by Western empires came to cover a larger portion of the globe than at any time before or since Why and how did this happen What were the consequences of this unprecedented scramble for dominion What methods have historians used to understand the increasingly large and structurally complex Western empires that emerged across the long 19th century In this fifth volume A Cultural History of Western Empires in the Age of Empire we trace these questions across a period bookended by two devastating global wars The forces that enabled unparalleled Western expansion were likewise violent Often no less traumatically the phenomenon was also one of cultural exchange and negotiated identities in which both colonized and colonizer were repeatedly made and remade As cultural historians we locate the power struggles of empire as much in identity and ways of life as in the movement of armies or the signing of treaties New technologies of communication transport and warfare brought an Age of Empire into existence for the West But it was equally grounded in new ways of

thinking about human difference and new beliefs about the state's power to intervene in the most intimate domains of human behavior

**Islands and the British Empire in the Age of Sail** Douglas Hamilton, John McAleer, 2021 Islands are not just geographical units or physical facts; their importance and significance arise from the human activities associated with them. The maritime routes of sailing ships, the victualling requirements of their sailors and the strategic demands of seaborne empires in the age of sail as well as their intrinsic value as sources of rare commodities meant that islands across the globe played prominent parts in imperial consolidation and expansion. This volume examines the various ways in which islands and groups of islands contributed to the establishment, extension and maintenance of the British Empire in the age of sail. Thematically related chapters explore the geographical, topographical, economic and social diversity of the islands that comprised a large component of the British Empire in an era of rapid and significant expansion. Although many of these islands were isolated rocky outcrops, they acted as crucial nodal points providing critical assistance for ships and men embarked on the long distance voyages that characterised British overseas activities in the period. Intercontinental maritime trade, colonial settlement and scientific exploration and experimentation would have been impossible without these oceanic islands. They also acted as sites of strategic competition, contestation and conflict for rival European powers keen to outstrip each other in developing and maintaining overseas markets, plantations and settlements. The importance of islands outstripped their physical size, the populations they sustained or their individual economic contribution to the imperial balance sheet. Standing at the centre of maritime routes of global connectivity, islands offer historians of the British Empire fresh perspectives on the intercontinental communication, commercial connections and territorial expansion that characterised that empire.

**The Ashgate Research Companion to Modern Imperial Histories** John

Marriott, 2016-03-23 Written by leading scholars, this collection provides a comprehensive and authoritative overview of modern empires. Spanning the era of modern imperial history from the early sixteenth century to the present, it challenges both the rather insular focus on specific experiences and gives due attention to imperial formations outside the West, including the Russian, Japanese, Mughal, Ottoman and Chinese. The companion is divided into three broad sections. Part I: Times surveys the three main eras of modern imperialism. The first was that dominated by the settlement impulse, with migrants, many voluntarily and many more by force, making new lives in the colonies. This impulse gave way, most especially in the nineteenth century, to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business, mostly of governance and trade. Lastly, in the twentieth century, in particular, empires began to fail and to fall. Part II: Spaces studies the principal imperial formations of the modern world. Each chapter charts the experience of a specific empire while, at the same time, placing it within the complex patterns of wider imperial constellations. The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect

critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire In these pages the reader will find the slave and the criminal the merchant and the maid the scientist and the artist alongside the structures which sustained their lives and their livelihoods Overall the companion emphasises the diversity of imperial experience and process Comprehensive in its scope it draws attention to the particularities of individual empires rather than over generalising as if all empires at all times and in all places behaved in a similar manner It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire
