

- I will ask students the thought provoking question "Does anyone know the name of everything you have just described? "
- I will explain to the class that the word is Landform. I will explain that the word Landform is simply another way of saying a feature of the earth's surface.
- I will explain that the items they described are all landforms.
- I will ask students to look at the Landform Worksheet on their desk and on the smartboard.
- I will ask them to identify with their tablemates what landforms they have seen or believe are in New York.

Procedure

Time	Teacher Action (include higher order thinking questions, grouping strategies)	Student Action
(15 mins)	I will tell students that we will find out together if their guesses are correct. We will do so by reading parts of the book, Geography from A to Z: A Picture Glossary by Jack Knowlton. Students will be asked to raise their hand if we come across a landform they wrote down.	Students will follow along and answer questions such as "What is the name of the ocean we see when we go the beach" "What is the name of the famous waterfall you may have seen?" They will answer each question after it is approached in the book.
(5 mins)	I will then ask the students to tell us what the different landforms they believe in New York are.	Students will discuss the landforms they wrote down and why. Where have they seen these landforms? Is there anything special they can do at these landforms?
(10)	I will again review the various landforms by telling the students to look at the smartboard. I will ask various students to read the landforms we agreed were in New York to the class. I will ask them to give me an example of one in New York..	Students will read the description of each landform to the class. Students will tell an example of one to the class. For example if they read the description for ocean, they may say Atlantic Ocean as an example.
10 Mins	I will then ask the students to stand up. I will ask them to give each other space from one another. I will explain that I will draw a landform on the smartboard. They must use their bodies to describe what landform it is. I will look for all students to be engaged and to have made some sort of shape. I will ask them to then shout out what they believe it is before drawing another one. I will then have students sit down. I will model the writing activity they will do. I will explain that they can talk to those in their group. I will walk around to each group and check on their progress and answer any questions.	Students will use their bodies to describe without words the landform that is drawn on the board. For example if the landform drawn is a mountain, students will lift their hands as high as it can go with hands closed together to represent the tip of the mountain. Students will continue this until all landforms in New York are answered. Students will complete the pen pal activity. Students will have the option of using the graphic organizer for their thoughts before writing on the looseleaf.
