Mathematics Teacher Training and Development in Africa Kakoma Luneta, Marc Schäfer, 2024-10-09 This edited volume addresses the need for reforms in mathematics teacher training spurred by scientific advancements and societal changes encompassing calls for changes in curricula content and instructional methods The text highlights the complexities of teaching mathematics specifically within Africa It provides an exploration into how mathematics teacher training has evolved to address challenges such as ineffective teaching approaches lack of resources technological limitations and outdated training programs Through comprehensive systematic reviews for each country in the African region documentation is provided on the past present and envisioned future of teacher training programs This undertaking provides a detailed analysis of mathematics teacher training offering valuable insights for teacher trainers government ministries of education and stakeholders across Africa For anyone invested in enhancing mathematics education in the region this book offers indispensable guidance and knowledge

STEM Education in Poverty Brantina Chirinda, Gladys Sunzuma, Perkins Muredzi, 2025-07-15 This book is about Science Technology Engineering and Mathematics STEM education in poverty and the lessons we learn from Zimbabwe The world is driving towards the fourth Industrial Revolution 4IR where economic growth has been attributed to STEM education STEM education is vital in this era where both developed and developing countries are undergo rapid changes Globally STEM education has been practised differently in schools and universities University programs new school curricula instructional methods extracurricular programs and professional development programs for in service teachers have been created to cater to STEM subjects STEM education is envisioned to produce critical thinkers inventors creators problem solvers innovators and professionals who will solve the world's ever changing challenges including inequity food insecurity climate change inequality and poverty STEM is essential to modern education Zimbabwe has faced significant economic challenges but has made remarkable strides in STEM education By examining the successes and challenges of STEM education in Zimbabwe we can learn valuable lessons about improving STEM education in underserved communities This book contributes to the international debate surrounding the optimal STEM education for students in underserved schools It incorporates detailed accounts of STEM education in Zimbabwe schools shedding light on the challenges students and educators face in impoverished areas In Zimbabwe STEM education faces significant challenges such as materials and facilities pedagogy policy reform access and relevance Some of the main issues highlighted in this book are the need for more resources including funding teaching materials and adequate laboratories Effective STEM pedagogy is hampered by an education system that emphasises the curriculum and teacher centred focus instead of focusing on how students can be taught or learn Research has shown that in Zimbabwe STEM teachers must apply inventive pedagogies and suitable learner centred STEM teaching approaches As a result there is a need for more STEM related programs and courses in schools and universities to improve the opportunities for students to pursue careers in these fields Another challenge is

the need for more awareness about the opportunities and importance of STEM education and interest in STEM subjects among students which can be attributed to a lack of exposure and understanding of the relevance and importance of these fields in today's world. While lack of resources and other challenges hinder effectiveness, opportunity lies in promising pathways of policy and practice. In Zimbabwe, there is a varying degree of success in the implemented competence-based curriculum which emphasises inquiry-based learning and STEM education. Finally, there is a need for early exposure to STEM-based career opportunities and for more collaboration between the government, private sector and educational institutions to address these challenges and promote STEM education in Zimbabwe. This book uses Zimbabwe as an example to explore STEM education in poverty. By examining the successes and challenges of STEM education in Zimbabwe, this book offers valuable insights into how STEM education can be integrated into the curriculum in countries with developing and emerging economies. This book is an essential resource for anyone interested in improving STEM education in underserved communities.

2012 & 2013 Work Plans of the Government of Zimbabwe and UNICEF Country Programme of Cooperation, 2012-2015, 2012 **School Science Practical Work in Africa** Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research-informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning, and the form of practical work that is strongly advocated is inquiry-based learning, which signals a definite paradigm shift from the traditional teacher-dominated to a learner-centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and postgraduate students in the fields of science education and educational policy.
