No Maybe Yes Living My Truth:

The Art of Touch Joan Schweighardt, Faye Rapoport DesPres, 2023-11-01 In *The Art of Touch* Prose and Poetry from the Pandemic and Beyond the unique voices of thirty nine of some of the most creative thinkers of our times have been brought together to consider the profound impact of one of our five main senses touch Psychologists healers massage therapists academics creative writers and others reflect on or tell personal stories about what it means to be able to touch or experience touch or to have to go without it as so many did and still do because of the COVID 19 pandemic They explore how transmissions such as texting may impede opportunities for touch while those like Zoom may make it possible for people who otherwise might be left behind to stay in touch From the experience of touching beloved animals to the life changing ways in which books and performances can touch us virtually all aspects of touch are acknowledged in these pages **Maybe Yes! Maybe No!** Khoo Chengkang, 2014 Ms Maybe Yes and Ms Maybe No are two good friends They re the daughters of perpetual arch rivals Mr Yes and Mr No respectively This bunch of essays and poems invites you to befriend these two comely daughters while you take your side with either Mr Yes or Mr No It encourages you to look for rainbows to draw in a little arts and philosophy to make your own music Had it not been for these two daughters this world would only show black and white right and wrong good and evil There would be no colours no culture no arts no democracy **Your Parents Lied to You** John Erickson, 2005-04 Just a few hundred years ago nearly everyone in the Western world was completely convinced that the Earth was at the center of the universe Why That is what they were taught to believe That is the way the world looks and feels Our ancestors failed to recognize that just because the Earth looks and feels as though it is stationary it does not necessarily mean that it is stationary Today nearly everyone in the Western world believes that human beings are intelligent individual entities that must find their own way through the world Why That is what they were taught to believe That is the way the world looks and feels As we look out upon the world we may feel that we have a pretty good understanding of the world that we live in and we certainly appear to be separate from one another but the lesson to be learned from our ancestors is that what seems obvious is not always true In order to develop a more effective understanding of ourselves and the world we live in sometimes we need to look beyond the obvious **Yes? No! Maybe...** Emilyn Claid, 2006-09-27 Covering fifty years of British dance from Margot Fonteyn to innovative contemporary practitioners such as Wendy Houstoun and Nigel Charnock Yes No Maybe is an innovative approach to performing and watching dance Emilyn Claid brings her life experience and interweaves it with academic theory and historical narrative to create a dynamic approach to dance writing Using the 1970s revolution of new dance as a hinge Claid looks back to ballet and forward to British independent dance which is new dance s legacy She explores the shifts in performer spectator relationships and investigates questions of subjectivity absence and presence identity gender race and desire using psychoanalytical feminist postmodern post structuralist and queer theoretical perspectives Artists and practitioners professional performers teachers choreographers

Madness and Creativity: Yes, No or Maybe? Anna Abraham,2015-11-23 The pervasive idea that madness and creativity are intricately linked is one that holds tremendous fascination for both scientists and the general public alike Although this view was at first largely driven by anecdotal evidence showcasing the manifestation of mental illness in individuals who exhibited extraordinary levels of creativity in various spheres of life it initiated a strong impetus to empirically investigate the association between mental health and creativity A variety of approaches and combinations of approaches have been adopted to address this association including clinical personality psychometric behavioral cognitive historiometric and neuroscientific Despite the ever accumulating body of evidence over the past six decades investigating this link what is lacking is a comprehensive overview of the disparate findings from these different approaches that will enable us to address the question of whether there is an empirically founded relationship between creativity and mental illness And if such a link does exist what is the nature of this association The purpose of this Research Topic was to motivate theorists and researchers to answer this question or at least attempt to do so given the available evidence thus far The themes of interest that were open to exploration in view of this topic included a Which mental disorders are positively associated with creativity b Which mental disorders are negatively associated with creativity c The dynamics of information processing biases positive versus negative associated with psychiatric and high risk populations d Theories regarding the madness creativity link e Personality based studies on creativity f Creativity mental illness and the brain g Genes and creativity h How can studies on neurological populations inform this debate i What are the areas of impact with regard to real world applications and practice j Historical timeline of this question k Evolutionary perspectives on the madness creativity link l Methodological problems associated with this field m Philosophical issues to bear in mind when investigating this domain n The usefulness of the troubled genius concept The invitation to contribute was open to all interested academics regardless of whether they were seasoned explorers within this field of study or just beginning to get their feet wet in its murky waters As a result of adopting this inclusive approach the contributions showcase a wide variety of perspectives from academic departments and institutions the world over What is most encouraging is that so many were willing to openly take on the challenge of tackling this difficult question head on We hope future discussions that follow through as a result of this collective effort will prove to be just as fruitful
