behind closed doors believing it is a private matter Thus the enormous social crisis of energy insecurity goes unnoticed Hernandez and Laird argue that household energy is a basic human right and detail policies and practices that would expand access to consistent safe clean and affordable energy Their proposals include improving the current energy safety net which is limited and often does not serve the most energy insecure due to stringent program requirements and administrative burdens They also suggest redesigning rates to accommodate income promoting enrollment and expansion of discount programs reforming utility disconnection policies improving energy literacy and ensuring an equitable shift to renewable energy resources Powerless creates a comprehensive picture of the complex social and environmental issue of energy insecurity and shows how energy equity is not just an aspiration but an achievable reality **Message from the Governor and the Budget Containing Financial Reports and Recommendations for Appropriations** New York (State).
