Application Portfolio Management

Objection: We need a full blown EA solution

- Many of our customers had this same reaction, but in reality we find that >90% of them are only doing Application Portfolio Management.
- Many of the other capabilities you find in other competitive tools make the tool more cumbersome to use and are too expensive.
- Our single system of record of the entire application portfolio simplifies planning experience inclusive of non-EA planning roles.
- Our native integrations (CMDB, SAM, GRC, etc.) are a natural expansion of your existing platform investment accelerating the time to value you get from APM.
- For more information on integrations to extend our capabilities and the APM product roadmap reach out to your account rep.

Objection: We're not mature enough

- By utilizing the SN platform most data maturity issues are eliminated. Starting out with classifying application inventory is our recommended approach.
- In the past, companies accomplish this in spreadsheets. Using an automated solution improves the ability to identify, monitor and remediate gaps.
- We have out of the box implementation plans making it easy to get value from the platform quickly.
