The Well-ordered Universe Deborah A. Boyle, 2018 The prolific Margaret Cavendish 1623 1673 published books on natural philosophy as well as stories plays poems orations allegories and letters Her mature philosophical system offered a unique panpsychist theory of Nature as composed of a continuous non atomistic perceiving knowing matter In contrast to the dominant philosophical thinking of her day Cavendish argued that all matter has free will and can choose whether or not to follow Nature's rules The Well Ordered Universe explores the development of Cavendish's natural philosophy from the atomism of her 1653 poems to the panpsychist materialism of her 1668 Grounds of Natural Philosophy Deborah Boyle argues that her natural philosophy her medical theories and her social and political philosophy are all informed by an underlying concern with order regularity and rule following This focus on order reveals interesting connections among apparently disparate elements of Cavendish's philosophical program including her views on gender on

animals and the environment and on sickness and health Focusing on the role of order in Cavendish's philosophy also helps reveal key differences between her natural philosophy and her more conservative social and political philosophy Cavendish believed that humans' special desire for public recognition often leads to an unruly ambition causing humans to disrupt society in ways not seen in the rest of Nature Thus The Well Ordered Universe defends Cavendish as a royalist who endorsed absolute monarchy and a rigid social hierarchy for maintaining order in human society

Nature, Environment and Poetry Susanna Lidström, 2015-06-19 The environmental challenges facing humanity in the twenty first century are not only acute and grave they are also unprecedented in kind complexity and scope Nonetheless or therefore the political response to problems such as climate change biodiversity loss and widespread pollution continues to fall short To address these challenges it seems clear that we need new ways of thinking about the relationship between humans and nature local and global and past present and future One place to look for such new ideas is in poetry designed to contain multiple levels of meaning at once challenge the imagination and evoke responses that are based on something more than scientific consensus and rationale This ecocritical book traces the environmental sensibilities of two Anglophone poets Nobel Prize winner Seamus Heaney 1939 2013 and British Poet Laureate Ted Hughes 1930 1998 Drawing on recent and multifarious developments in ecocritical theory it examines how Hughes's and Heaney's respective poetics interact with late twentieth century developments in environmental thought focusing in particular on ideas about ecology and environment in relation to religion time technology colonialism semiotics and globalisation This book is aimed at students of literature and environment the relationship between poetry and environmental humanities and the poetry of Ted Hughes or Seamus Heaney

Contemporary Irish Poetry and the Pastoral Tradition Donna L. Potts, 2012-01-01 In Contemporary Irish Poetry and the Pastoral Tradition Donna L. Potts closely examines the pastoral genre in the work of six Irish poets writing today Through the exploration of the poets and their works she reveals the wide range of purposes that pastoral has served in both Northern Ireland and the Republic a postcolonial critique of British imperialism a response to modernity industrialization and globalization a way of uncovering political and social repercussions of gendered representations of Ireland and more recently a means for conveying environmentalism's more complex understanding of the value of nature Potts traces the pastoral back to its origins in the work of Theocritus of Syracuse in the third century and plots its evolution due to cultural changes While all pastoral poems share certain generic traits Potts makes clear that pastorals are shaped by social and historical contexts and Irish pastorals in particular were influenced by Ireland's unique relationship with the land language and industrialization due to England's colonization For her discussion Potts has chosen six poets who have written significant collections of pastoral poetry and whose work is in dialogue with both the pastoral tradition and other contemporary pastoral poets Three poets are men John Montague Seamus Heaney Michael Longley while three are women Eavan Boland Medbh McGuckian Nuala Ní Dhomhnaill Five are English language authors while the sixth Ní Dhomhnaill writes in Irish Additionally some of the

poets hail from the Republic while others originate from Northern Ireland Potts contends that while both Irish Republic and Northern Irish poets respond to a shared history of British colonization in their pastorals the 1921 partition of the country caused the pastoral tradition to evolve differently on either side of the border primarily because of the North's more rapid industrialization its more heavily Protestant population whose response to environmentalism was somewhat different than that of the Republic's predominantly Catholic population as well the greater impact of the world wars and the Irish Troubles In an important distinction from other studies of Irish poetry Potts moves beyond the influence of history and politics on contemporary Irish pastoral poetry to consider the relatively recent influence of ecology Contemporary Irish poets often rely on the motif of the pastoral retreat to highlight various environmental threats to those retreats whether they be high rises motorways global warming or acid rain Potts concludes by speculating on the future of pastoral in contemporary Irish poetry through her examination of more recent poets including Moya Cannon and Paula Meehan as well as other genres such as film drama and fiction

environmentalism and landscape architecture by reframing the issues through self reflection instead of strategic debate
