This book reviews how people and animals learn and how their behaviors are later changed as a result of this learning Nearly
all of our behaviors are influenced by prior learning experiences in some way This book describes some of the most important
principles theories controversies and experiments that pertain to learning and behavior that are applicable to many different
species and many different learning situations Many real world examples and analogies make the concepts and theories more
concrete and relevant to the students In addition most of the chapters include sections that describe how the theories and
principles have been used in the applied field of behavior modification Each chapter in the seventh edition was updated with
new studies and new references that reflect recent developments in the field The book includes a number of learning aids for
students including a list of learning objectives at the beginning of each chapter practices quizzes and review questions and a
glossary for all important terms Learning Behavior covers topics such as classical and operant conditioning reinforcement
schedules avoidance and punishment stimulus control comparative cognition observational learning motor skill learning and
choice Both the classic studies and the most recent developments and trends in the field are explored Although the
behavioral approach is emphasized many cognitive theories are covered as well along with a chapter on comparative
cognition Upon completing this book readers will be able to understand the field of learning and discuss real world
applications of learning principles
