Susko,2020-07-08 This work offers new metaphors to understand our biological world one more in accord with scientific evidence more in harmony with preserving our planet and one which leads us to live fuller lives First it recognizes a natural extravagance that life often exceeds our expectation in terms of number variety beauty and capacity for change Our ability to understand and even to categorize life s many manifestations is often beyond our reach Such extravagance is accompanied by an important second dimension life s dynamic vulnerability Life needs to take in outside energy to exist and is acutely sensitive to the environment with its many vagaries This vulnerability is paradoxically linked to a dynamism which leads to evolutionary novelty Rather than emphasizing the end state of evolution in terms of fitness this work focuses on the vulnerable process of change itself In re envisioning biology more accurate to the onrush of current discoveries we offer a vision that better protects and preserves our world The issue at hand is nothing less than our evolutionary future The Nature of Matter Gr. 5-8 , **Review of EPA's Proposed Ozone and Particulate Matter NAAQS Revisions** United States.
