Rfid Security And Privacy Robert H Deng:

RFID Security and Privacy Yingjiu Li,Robert Deng,Elisa Bertino,2013-12-01 As a fast evolving new area RFID security and privacy has quickly grown from a hungry infant to an energetic teenager during recent years Much of the exciting development in this area is summarized in this book with rigorous analyses and insightful comments In particular a systematic overview on RFID security and privacy is provided at both the physical and network level At the physical level RFID security means that RFID devices should be identified with assurance in the presence of attacks while RFID privacy requires that RFID devices should be identified without disclosure of any valuable information about the devices At the network level RFID security means that RFID information should be shared with authorized parties only while RFID privacy further requires that RFID information should be shared without disclosure of valuable RFID information to any honest but curious server which coordinates information sharing Not only does this book summarize the past but it also provides new research results especially at the network level Several future directions are envisioned to be promising for advancing the research in this area

Cyber-Physical Security and Privacy in the Electric Smart Grid Bruce McMillin,Thomas Roth,2022-06-01 This book focuses on the combined cyber and physical security issues in advanced electric smart grids Existing standards are compared with classical results and the security and privacy principles of current practice are illustrated The book paints a way for future development of advanced smart grids that operated in a peer to peer fashion thus requiring a different security model Future defenses are proposed that include information flow analysis and attestation systems that rely on fundamental physical properties of the smart grid system

Advanced Security and Privacy for RFID Technologies Miri, Ali,2013-03-31 This book addresses security risks involved with RFID technologies and gives insight on some possible solutions and preventions in dealing with these developing technologies

Information Security Jianying Zhou,Robert H. Deng,Feng Bao,2005-08-29 This volume contains the proceedings of the 8th International

Information security Conference ISC 2005 which took place in Singapore from 20th to 23rd September 2005 ISC 2005 brought together individuals from academia and industry involved in many research disciplines of information security to foster the exchange of ideas During recent years this conference has tried to place special emphasis on the practical aspects of information security and since it passed from being an international workshop to being an international conference in 2001 it has become one of the most relevant forums at which researchers meet and discuss emerging security challenges and solutions Advised by the ISC Steering Committee and in order to provide students with more opportunities for publication ISC 2005 accepted extra student papers besides the regular papers The initiative was very well accepted by the young sector of the scientific community and we hope that the success of this idea will remain for next ISC events

Another important factor for the success of ISC 2005 was that selected papers in the proceedings will be invited for submission to a special issue of the International Journal of Information Security The result was an incredible response to the call for papers we received 271 submissions the highest since ISC events started It goes without saying that the paper selection process was more competitive and difficult than ever before only 33 regular papers were accepted plus 5 student papers for a special student session

Privacy Risk Analysis Sourya Joyee De, Daniel Le Métayer, 2022-05-31 Privacy Risk Analysis fills a gap in the existing literature by providing an introduction to the basic notions requirements and main steps of conducting a privacy risk analysis The deployment of new information technologies can lead to significant privacy risks and a privacy impact assessment should be conducted before designing a product or system that processes personal data However if existing privacy impact assessment frameworks and guidelines provide a good deal of details on organizational aspects including budget allocation resource allocation stakeholder consultation etc they are much vaguer on the technical part in particular on the actual risk assessment task For privacy impact assessments to keep up their promises and really play a decisive role in enhancing privacy protection they should be more precise with regard to these technical aspects This book is an excellent resource for anyone developing and or currently running a risk analysis as it defines the notions of personal data stakeholders risk sources feared events and privacy harms all while showing how these notions are used in the risk analysis process It includes a running smart grids example to illustrate all the notions discussed in the book

Radio Frequency Identification System Security Lo Nai-Wei, Yingjiu Li, 2012 The revolution in information management brought about in recent years by advances in computer science has presented many challenges in the field of security and privacy technology This book presents the proceedings of RFIDsec12 Asia the 2012 workshop on radio frequency identification RFID and the internet of things IoT Security held in Taipei Taiwan in November 2012 RFIDsec12 Asia provides researchers enterprises and governments with a platform to investigate discuss and propose new solutions to security and privacy issues relating to RFID IoT technologies and applications Some of the topics covered in the nine

Radio Frequency Identification System Security N.-W. Lo, Y. Li, K.-H. Yeh, 2014-11-11 The increasing reliance on sophisticated computer technology for the

management of data and information in developed and developing societies means that security and privacy technologies are also of great importance everywhere in the world This book presents papers from the 2014 Workshop on Radio Frequency Identification System Security RFIDsec 14 Asia held in Hualien Taiwan in November 2014 This workshop aimed to provide researchers enterprises and governments with a platform to investigate discuss and propose new solutions for the security and privacy issues of technologies and applications related to RFID and the Internet of Things IoT Topics covered include the implementation of passive UHF RFID tags practical NFC privacy preserving applications the design of multi ownership transfer protocols and lightweight authentication of RFID The five high quality papers included here will be of interest to all those involved in improving the security of computerized systems wherever they are **Radio Frequency Identification**

System Security Yingjiu Li,Jiaying Zhou,2010 The book covers many topics including unconditionally secure RFID systems dynamic RFID tag authentication RFID ownership transfer fingerprinting RFID tags and secure RFID supported supply chains Information Security Practice and Experience Feng Bao,Liqun Chen,Robert H. Deng,Guojun Wang,2016-11-02

This book constitutes the proceedings of the 12th International Conference on Information Security and Practice and Experience ISPEC 2016 held in Zhangjiajie China in November 2016 The 25 papers presented in this volume were carefully reviewed and selected from 75 submissions They cover multiple topics in information security from technologies to systems and applications **Introduction to Secure Outsourcing Computation** Xiaofeng Chen,2022-05-31 With the rapid development of cloud computing the enterprises and individuals can outsource their sensitive data into the cloud server where they can enjoy high quality data storage and computing services in a ubiquitous manner This is known as the outsourcing computation paradigm Recently the problem for securely outsourcing various expensive computations or storage has attracted considerable attention in the academic community In this book we focus on the latest technologies and applications of secure outsourcing computations Specially we introduce the state of the art research for secure outsourcing some specific functions such as scientific computations cryptographic basic operations and verifiable large database with update The constructions for specific functions use various design tricks and thus result in very efficient protocols for real world applications The topic of outsourcing computation is a hot research issue nowadays Thus this book will be beneficial to academic researchers in the field of cloud computing and big data security Applied Cryptography and Network Security

Jiaying Zhou,Moti Yung,2010-06-09 This book constitutes the proceedings of the 8th International Conference on Applied Cryptography and Network Security ACNS 2010 held in Beijing China in June 2010 The 32 papers presented in this volume were carefully reviewed and selected from 178 submissions The papers are divided in topical sections on public key encryption digital signature block ciphers and hash functions side channel attacks zero knowledge and multi party protocols key management authentication and identification privacy and anonymity RFID security and privacy and internet security

Information Security and Privacy Colin Boyd,Juan González Nieto,2009-06-15 This book constitutes the refereed

Usable Security Simson Garfinkel, Heather Richter Lipford, 2022-06-01 There has been roughly 15 years of research into approaches for aligning research in Human Computer Interaction with computer Security more colloquially known as usable security Although usability and security were once thought to be inherently antagonistic today there is wide consensus that systems that are not usable will inevitably suffer security failures when they are deployed into the real world Only by simultaneously addressing both usability and security concerns will we be able to build systems that are truly secure This book presents the historical context of the work to date on usable security and privacy creates a taxonomy for organizing that work outlines current research objectives presents lessons learned and makes suggestions for future research

Database Anonymization Josep Domingo-Ferrer, David Sánchez, Jordi Soria-Comas, 2022-05-31 The current social and economic context increasingly demands open data to improve scientific research and decision making However when published data refer to individual respondents disclosure risk limitation techniques must be implemented to anonymize the data and guarantee by design the fundamental right to privacy of the subjects the data refer to Disclosure risk limitation has a long record in the statistical and computer science research communities who have developed a variety of privacy preserving solutions for data releases This Synthesis Lecture provides a comprehensive overview of the fundamentals of privacy in data releases focusing on the computer science perspective Specifically we detail the privacy models anonymization methods and utility and risk metrics that have been proposed so far in the literature Besides as a more advanced topic we identify and discuss in detail connections between several privacy models i e how to accumulate the privacy guarantees they offer to achieve more robust protection and when such guarantees are equivalent or complementary we also explore the links between anonymization methods and privacy models how anonymization methods can be used to enforce privacy models and thereby offer ex ante privacy guarantees These latter topics are relevant to researchers and advanced practitioners who will gain a deeper understanding on the available data anonymization solutions and the privacy guarantees they can offer

Aspects of Personal Privacy in Communications - Problems, Technology and Solutions Geir M. Koien, Vladimir a. Oleshchuk, 2025-01-13

The modern society is rapidly becoming a fully digital society This has many benefits but unfortunately it also means that personal privacy is threatened The threat does not so much come from a 1984 style Big Brother but rather from a set of smaller big brothers The small big brothers are companies that we interact with they are public services and institutions Many of these little big brothers are indeed also being invited to our private data by ourselves Privacy as a subject can be problematic At the extreme it is personal freedom against safety and security We shall not take a political stand on personal privacy and what level of personal freedom and privacy is the correct one Aspects of Personal Privacy in Communications is mostly about understanding what privacy is and some of the technologies may help us to regain a bit of privacy We discuss what privacy is about what the different aspects of privacy may be and why privacy needs to be there by default There are boundaries between personal privacy and societal requirements and inevitably society will set limits to our privacy Lawful Interception etc There are technologies that are specifically designed to help us regain some digital privacy These are commonly known as Privacy Enhancing Technologies PETs We investigate some these PETs including MIX networks Onion Routing and various privacy preserving methods Other aspects include identity and location privacy in cellular systems privacy in RFID Internet of Things IoT and sensor networks amongst others Some aspects of cloud systems are also covered

Differential Privacy Ninghui Li, Min Lyu, Dong Su, Weining Yang, 2022-05-31 Over the last decade differential privacy DP has emerged as the de facto standard privacy notion for research in privacy preserving data analysis and publishing The DP notion offers strong privacy guarantee and has been applied to many data analysis tasks This Synthesis Lecture is the first of two volumes on differential privacy This lecture differs from the existing books and surveys on differential privacy in that we take an approach balancing theory and practice We focus on empirical accuracy performances of algorithms rather than asymptotic accuracy guarantees At the same time we try to explain why these algorithms have those empirical accuracy performances We also take a balanced approach regarding the semantic meanings of differential privacy explaining both its strong guarantees and its limitations We start by inspecting the definition and basic properties of DP and the main primitives for achieving DP Then we give a detailed discussion on the the semantic privacy guarantee provided by DP and the caveats when applying DP Next we review the state of the art mechanisms for publishing histograms for low dimensional datasets mechanisms for conducting machine learning tasks such as classification regression and clustering and mechanisms for

publishing information to answer marginal queries for high dimensional datasets Finally we explain the sparse vector technique including the many errors that have been made in the literature using it The planned Volume 2 will cover usage of DP in other settings including high dimensional datasets graph datasets local setting location privacy and so on We will also discuss various relaxations of DP
