

Instructions

In the `U6_L3_Activity_Three` class, write a public static method called `printun`, which has a single parameter of an array of String values.

The method `printun`, which should be void, must print all the Strings from the parameter array which start with "un".

Use the runner class to test this method: do not add a main method to your code in the `U6_L3_Activity_Three.java` file or it will not be scored correctly.

Hint: you will need to get the substring containing the first 2 letters of each string, and compare it to "un", but be careful - your parameter array may contain Strings which are less than 2 characters long.

Sample run (runner class):
