Example 1: Position: Deputy Head and Key Stage 2 Leader

In my role as Deputy Head and Key Stage 2 Leader at Riverdale Primary School, I have had the privilege of taking on a leadership role that encompasses both whole-school responsibilities and a specific focus on Key Stage 2. This dual role has enabled me to develop a holistic approach to school leadership while maintaining a keen focus on the crucial transitional years for our students.

One significant achievement in my role as Deputy Head was the implementation of a school-wide behaviour management system. Recognising the importance of fostering a positive and orderly school environment, I led a comprehensive review of our behaviour policy, involving consultations with staff, parents, and students. The result was a tailored behaviour management plan that improved student conduct and engagement across all key stages. Over the course of a single academic year, behavioural incidents decreased by 25%, leading to a more conducive learning environment for all students.

As the Key Stage 2 Leader, I recognised the need to enhance our students' academic performance as they transitioned into upper primary years. I introduced a targeted intervention programme for students who needed additional support in English and Mathematics. By closely monitoring the progress of these students and adjusting our teaching strategies accordingly, we achieved a remarkable 15% increase in Key Stage 2 SATs results in just one year. This improvement not only reflected my dedication to academic excellence but also demonstrated my ability to lead a team effectively and engage students in their learning journey.

The Two Directions Formulating a Crisis in Primary Catholic School Leadership Rachel Gould, 2018-07-27 Since the year 2000 there has been a statistically high proportion of head teachers leaving the profession While there have been studies conducted to predict when this exodus would conclude the actual reasons for why senior people are leaving their positions have not been explored so far Schools have found replacing head teachers increasingly difficult and the inevitable leadership crisis has been well documented by both scholars and the media The leadership crisis has been most noticeable within the Catholic Primary School sector where statistics have consistently shown an issue with recruiting people to headship positions This book considers the reasons for the crisis and looks at potential solutions It identifies what the leadership crisis encompasses from the negativity of the education system including headship accountability the work life balance and salary whilst also offsetting this with possible supporting solutions such as the value of acting headship succession planning and talent spotting from the beginning of a teacher's career *The Under-Representation of Black and Minority Ethnic Educators in Education* Chris Guy Vieler-Porter, 2020-11-01 The Under Representation of Black and Minority Ethnic Educators in Education evidences that discrimination at an individual institutional and structural level is still experienced in the leadership of children's learning The analysis evaluates the extent to which under representation is a result of chance coincidence or design Based on original research using a mixed methods approach and drawing on Critical Race Theory this book examines the under representation of Black and minority ethnic BAME educators in education It identifies over 40

separate codes emerging from interviews with BAME leaders in children's learning. These codes include surveillance, isolation, awareness of their position, the need to be better, professional development, the complexity of racism and the difficulties of talking about racism. The book contributes to educational leadership in questioning the extent to which equitable outcomes can be delivered when the education service is itself a site and source of inequality and discrimination. It brings to front the suppressed narratives of underrepresentation of people of colour and offers insights based on comprehensive data collection. This book will be of great interest for academics, researchers and postgraduate students in the fields of education management and leadership.

Primary education is one of the most important phases of learning, but there remains a scarcity of in-depth research on this vital topic. However, as the focus on improving outcomes increases, there is a growing interest internationally in research that helps us to understand the best ways to help young children engage with the curriculum in order that they may have the best possible life chances. This text helps to address these issues and consists of seminal articles derived from the forty-year history of the journal *Education 3-13*, which can claim to be one of the most important and influential publications in its field. The chapters included have been chosen carefully to represent a wide range of key topics in research on primary education, and the text is subdivided into five sections, each of which has been edited by leading academics who specialise in the topic under scrutiny. The sections include Learning and teaching, including the psychology and philosophy of primary education; Key challenges in primary education, including changes to the governance of schools and educational management and leadership; The primary curriculum, including Maths, Science, IT and Technology Education; The primary curriculum, including English, Humanities and the Arts; and Primary teachers' work and professionalism. Many of the contributions are written by seminal figures in academic research. The text will be especially relevant to students and researchers engaged in the study of primary education, as well as to practitioners, advisers and policy makers, and will prove an invaluable resource for those wishing to gain an overview of research into primary education. It is recommended especially for those who wish to understand the development of primary education and the many twists and turns in theory, practice and policy that have influenced its

development over the period of a generation Those who read the text will come across the origins of many of the ideas that continue to influence primary teaching today as well as very recent research on where we are now in this important subject area **Training of teachers** Great Britain: Parliament: House of Commons: Children, Schools and Families
