*Validating Technological Innovation* David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Religion and Development in Southern and Central Africa: Vol 2 Amanze, James N., Masango, Maake, 2020-01-19 This book is a result of a joint conference which was held from 18th-22nd July 2017 under the theme Religion, Citizenship and Development: Southern African Perspectives. The theme of the conference was adopted in order to underline the importance and significance of religion in the socio-economic development of people in the world generally and in Southern and Central Africa in particular. The papers in the book are divided into two volumes. Volume one consists of papers which directly discuss religion and development in one form or another. The second volume contains papers that discuss religion and other pertinent issues related to development. The papers are grouped into sub-themes for ease of reference. These include Citizenship and Development, Migration and Development, Disability and Development, Pentecostal Churches and Development, and Religion and Society. All in all, despite a divergence of sub-themes in volume two, all point to issues to do with the role of religion in development in Southern and Central Africa today.

**The World of Science Education** Femi S. Otulaja, Meshach B. Ogunniyi, 2017-09-12 Each volume in the 7-volume series *The World of Science Education* reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe, and Israel, North Africa and the Middle East, and Sub-Saharan Africa. The focus of this Handbook is on research in science education in mostly former British colonies in Sub-Saharan Africa and the scholarship that most closely support this program. The reviews of the research situate what has been accomplished within a given field in Sub-Saharan Africa rather than an international context. The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts. The approach allows readers to review what has been done and accomplished, what is missing, and what might be done next.
