NU-VU's UB-12R oven features our patented V-AIR® System in the oven. The heat is distributed evenly throughout the oven cavity by the fan located in the top of the oven which blows the air down the inside walls of the cavity and up and out through the holes at each shelf. This gives your product an even bake, top to bottom, side to side and front to back without ever turning pans.

Roll-In Rack ovens are designed to provide very high volume baking in a minimal amount of space and with minimal labor.

Available in both gas (model UB-12RG available in natural and LP gas) and electric, these rugged, heavy-duty ovens are ideal for correctional institutions, schools, hotels, hospitals, resorts or any facility which needs the advantages of a full rack production. The oven's compact design allows for installation under existing hood systems.
