The Strategic Repositioning of Arts, Culture and Heritage in the 21st Century George Mugovhani, Owen Seda, 2018-06-11 The post millennium world has been experiencing several recognisable historical milestones with regard to arts culture and heritage One of these has been the resuscitation and revival of creative elements of the arts culture and heritage of previously marginalised or disadvantaged communities around the world Until recently there had been scant regard and skewed allocation of resources for these but lately attempts have been made to promote and sustain them in order to enable the socio economic aspirations of a multicultural society The contributions brought together here are the product of papers that were presented during a conference on Strategic Repositioning of Arts Culture and Heritage in the 21st Century They cover a broad spectrum of subjects such as indigeneity music song and identity politics national reconciliation education product development and national development

Planning By Law and Property Rights Reconsidered Barrie Needham, Thomas Hartmann, 2016-04-22 Countries which take spatial planning seriously should take planning law and property rights also seriously There is an unavoidable logical relationship between planning law and property rights However planning by law and property rights is so familiar and taken for granted that we do not think about the theory behind it As a result we do not think abstractly about its strengths and weaknesses about what can be achieved with it and what not how it can be improved how it could be complemented Such reflections are essential to cope with current and future challenges to spatial planning This book makes the often implicit theory behind planning by law and property rights explicit and relates it to those challenges It starts by setting out what is understood by planning by law and property rights and investigates theoretically and by game simulation the relationships between planning law and property rights It then places planning law and property rights within their institutional setting at three different scales when a country undergoes enormous social and political change when there is fundamental political debate about the power of the state within a country and when a country changes its legislation in response to European policy Not only changing institutions but also global environmental change pose huge challenges for spatial planning The book discusses how planning by law and property rights can respond to those challenges by adaptive planning by adaptable property rights and by public policies at the appropriate geographical level Planning by law and property rights can fix a local regime of property rights which turns out to be inappropriate but difficult to change It questions whether such regimes can be changed and whether planning agencies can make such undesirable lock ins less likely by reducing market uncertainty and if so by what means

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in

the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience Method, Substance, and the Future of African Philosophy Edwin E. Etieyibo, 2018-02-24 This book takes stock of the strides made to date in African philosophy Authors focus on four important aspects of African philosophy the history methodological debates substantive issues in the field and direction for the future By collating this anthology Edwin E Etieyibo excavates both current and primordial knowledge in African philosophy enhancing the development of this growing field **South African Human Sciences Research Networking Directory**, 1996 **Namibia Under South African Rule** Patricia Hayes, 1998 The peoples of Namibia have been on the move throughout history The South Africans took over from the Germans in 1915 in trying to fit them into a colonial landscape This book is about the clashes and stresses which resulted from the determined efforts at containment during the first three decades of South African colonial rule Book jacket Shut Down the Business School Martin Parker, 2018-05-20 Business schools are institutions which a decade after the financial crash continue to act as loudspeakers for neoliberal capitalism with all its injustices and planetary consequences In this lively and incendiary call to action Martin Parker offers a simple message shut down the business school Parker argues that business schools are cash cows for the contemporary university that have produced a generation of unreflective managers primarily interested in their own personal rewards If we see universities as institutions with responsibilities to the societies they inhabit then we must challenge the common notion that the market should be the primary determinant of the education they provide Shut Down the Business School makes a compelling case for a radical alternative in the form of a School for Organising This institution would develop and teach on different forms of organising instead of reproducing the dominant corporate model enabling individuals to discover alternative responses to the pressing issues of inequality and sustainability faced by all of us today Ordinary Whites in Apartheid Society Neil Roos, 2024-02-06 How were whites implicated in and shaped by apartheid culture and society and how did they contribute to it In Ordinary Whites in Apartheid Society historian Neil Roos traces the lives of ordinary white people in South Africa during the apartheid years beginning in 1948 when the National Party swept into power on the back of its catchall apartheid slogan Drawing on his own family's story and others Roos explores how working class whites frequently defied particular aspects of the apartheid state but seldom opposed or even acknowledged the idea of racial supremacy which lay at the heart of the apartheid society This cognitive dissonance afforded them a way to

simultaneously accommodate and oppose apartheid and allowed them to later claim they never supported the apartheid system Ordinary Whites in Apartheid Society offers a telling reminder that the politics and practice of race in this case apartheid era whiteness derive not only from the top but also from the bottom *Uprooting University Apartheid in South Africa* Teresa A. Barnes,2018-12-07 South Africa continues to be an object of fascination for people everywhere interested in social justice issues postcolonial studies and critical race theory as manifested by the enormous worldwide attention given to the RhodesMustFall movement In this book Teresa Barnes examines universities complex positioning in the apartheid era and argues that tracing the institutional legacies left by pro apartheid intellectuals are crucial to understanding the fight to transform South African higher education A work of interpretive social history this book investigates three historical dynamics in the relationship between the apartheid system and South African higher education First it explores how the legitimacy of apartheid was historically reproduced in public higher education Second it looks at ways that academics maneuvered through and influenced national and international discourses of political freedom and legitimacy Third it explores how and where stubborn tendrils of apartheid era knowledge production practices survived into and have been combatted during the democratic era in South African universities **Educational Systems of Africa** Martena Tenney Sasnett,Inez Hopkins Sepmeyer,1967 Monograph outlining the educational system of each African country includes information on primary education secondary education higher education vocational training teacher training technical education etc In respect of examinations certificates and degrees curriculum hours per week for each subject matriculation requirements etc Bibliography pp 1510 to 1550 maps references and statistical tables **Catalogue of Printed Books** British Museum.
