Fighting Global Neo-Extractivism Jasper Finkeldey, 2022-08-02 Fighting Global Neo Extractivism. Fossil Free Social Movements in South Africa analyzes social struggles over damaging new fossil fuel projects in the Global South with a focus on South Africa. Africa's biggest fossil fuel emitter, Fossil fuel extraction in South Africa has reached a new accelerated phase in which the fossil fuel frontier is moving beyond historical sacrifice zones into non traditional spaces such as conservation parks and middle class neighbourhoods, and provoking fervent opposition from grassroots activists. This book examines campaigns such as Frack Free South Africa and Save our iMfolozi Wilderness, viewing them as struggles against neo extractivism driven by the state and industry. Through a series of detailed case studies, it highlights the shaping of mobilisation patterns by prior land use practices and the capacity to mobilize different social groups across race and class. Developing the notion of the fossil fuel frontier as the material and

Eskom Sylvie Jaglin, Alain Dubresson, 2016-08-16 Africa's leading producer of electricity Eskom Holdings SOC Ltd is also a vertically integrated monopoly owned by the South African state This national champion was shaken in 2008 when it was obliged to introduce load shedding or rolling blackouts and again in late 2014 Trying to understand how and why one of the iconic pillars of South African state capitalism is now in distress the authors of this book argue that the so called electricity crisis is in fact a public monopoly crisis Moving beyond technical aspects they explore the relationship between state power and Eskom before during and after apartheid From this perspective they suggest that the current technical and financial troubles of this public utility are illustrative of the weakening of its technopolitical regime of how national institutions have governed Eskom's technological development and of the pursuit of political goals in the production of electrical power Without a clear industrial strategy during the 2000s Eskom became a powerful tool of Broad Black Economic Empowerment as well as a neopatrimonial system which generates profits captured by the ruling party As a result crisis in Eskom shakes the whole political edifice Inefficient and its finances increasingly under scrutiny this state owned enterprise's existence as a monopolistic public utility is regularly a subject of debate The authors discuss the ambivalent role of Eskom in the national energy transition policy and whether solutions point in the direction of de-integrating this public monopoly and allowing its current technopolitical regime to enter a planned or natural decline
