Hezbollah's political ideology and how it evolves over time and the conditions that lead to the change of ideology. The author also examines Hezbollah's relationship with the patron states Syria and Iran. In contrast with major arguments in the literature, the book argues that political ideologies are not fixed and they evolve depending on a number of factors such as the change in context, major events like a civil war in the patron state, and most importantly when the change of ideology becomes linked to survival of the insurgency. This monograph will appeal to a wide range of audiences such as researchers, scholars, and graduate students in the fields of Middle Eastern studies, political studies, Islamism, and nationalism.

**Everyday War** Greta Lynn Uehling, 2023-02-15. *Everyday War* provides an accessible lens through which to understand what noncombatant civilians go through in a country at war. What goes through the mind of a mother who must send her child to school across a minefield or the men who belong to groups of volunteer body collectors? In Ukraine, such questions have been part of the daily calculus of life. Greta Uehling engages with the lives of ordinary people living in and around the armed conflict over Donbas that began in 2014 and shows how conventional understandings of war are incomplete. In Ukraine, landscapes filled with death and destruction prompted attentiveness to human vulnerabilities and the cultivation of everyday interpersonal peace. Uehling explores a constellation of social practices where ethics of care were in operation. People were also drawn into the conflict in an everyday form of war that included provisioning fighters with military equipment, they purchased themselves, smuggling insulin, and cutting ties to former friends. Each chapter considers a different site where care can produce interpersonal peace or its antipode, everyday war. Bridging the fields of political geography, international relations, peace and conflict studies, and anthropology, *Everyday War* considers where peace can be cultivated at an everyday level.

**Streaming Video Collection Development and Management** Michael Fernandez, Amauri Serrano, 2025-01-23. This accessible how-to manual addresses new considerations for libraries in building and managing streaming video collections. Streaming video is not new to the library environment, but recent years have seen an exponential growth in the number of platforms and titles available for streaming. For libraries, this has meant an increasingly complex acquisitions landscape with more vendors occupying the marketplace and larger portions of the budget dedicated to streaming. Users increasingly expect video content to be available online and on demand, and streaming video is increasingly integrated into coursework. Michael Fernandez and Amauri Serrano outline the myriad challenges of managing streaming video content across all stages of the electronic resources lifecycle, from initial collection decisions to the user's experience of accessing the content. At every step, they provide practical advice on how to handle these challenges regardless of the size and budget of the institution. Librarians at community colleges, research institutions, specialized schools, and public libraries will find this a valuable and engaging guide.
