**Biosynthetic Products for Cancer Chemotherapy** George Pettit, 2012-12-06 Cancer exacts an incredibly destructive toll on the world's human populations. In recent years we have frequently heard the expression war on cancer but compared to the carnage inflicted by cancer our scientific and medical efforts to date would seem more like a minor skirmish. Some comprehension of the cancer problem can be obtained from a look at the current and projected casualty list for the United States. In this country about 700 000 new cases of cancer will be diagnosed in 1976 and over 1 million known cases will continue to be treated. Over 400 000 of these patients will die from cancer in our bicentennial year. With the incidence of cancer in the United States increasing to 5.2% in 1975 compared to the 1.1% yearly rate experienced for decades Dr F J Rauscher Jr 338 Director of the National Cancer Institute has estimated that more than 10 million people will be under treatment for cancer and nearly 4 million will expire from cancer in this decade. At that rate cancer will appear in nearly two of three families and the necessary medical care will cost some 15.20 billion per year. Thus unless methods for the treatment and control of cancer are markedly improved about 53 million Americans now alive will eventually be cancer patients. Unfortunately the major types of human cancer are still beyond curative care by surgical and radiological techniques and because of the paucity of currently available cancer chemotherapeutic drugs with curative potential

**Integrating and Connecting Care** A. Ryan, L.K. Schaper, S. Whetton, 2017-08-10 The last few decades have seen the digital transformation of healthcare with health informaticians taking the lead in innovations which have enabled the sector to evolve from rudimentary computer based records to large scale systems allowing for intra organisational national and even international communication and information exchange. Establishing and maintaining strong partnerships between the healthcare community government universities and industry is integral to supporting these advances. This book presents 24 selected papers from the 25th Australian National Health Informatics Conference HIC 2017 held in Brisbane Australia in August 2017. The theme of HIC 2017 is Integrating and Connecting Care and the conference provides the ideal professional and social environment for clinicians researchers health IT professionals industry and consumers to integrate educate and share their knowledge and debate current and future health systems. The papers in the book reflect the theme of the conference highlighting the cutting edge research evidence technology updates and innovations crucial to the digital transformation of the healthcare sector. Health informatics and e health play a central role in connecting information systems being smart with data and enhancing both practitioner and consumer experience in healthcare interactions and the book will be of interest to researchers and practitioners alike.
