Putnam, 2001-08-01 Once we bowled in leagues usually after work but no longer This seemingly small phenomenon symbolizes a significant social change that Robert

Putnam has identified in this brilliant volume *Bowling Alone* which *The Economist* hailed as a prodigious achievement. Drawing on vast new data that reveal Americans changing behavior, Putnam shows how we have become increasingly disconnected from one another and how social structures, whether they be PTA, church, or political parties, have disintegrated. Until the publication of this groundbreaking work, no one had so deftly diagnosed the harm that these broken bonds have wreaked on our physical and civic health, nor had anyone exalted their fundamental power in creating a society that is happy, healthy, and safe. Like defining works from the past such as *The Lonely Crowd* and *The Affluent Society*, and like the works of C. Wright Mills and Betty Friedan, Putnam's *Bowling Alone* has identified a central crisis at the heart of our society and suggests what we can do.

Updates in Diagnostic Pathology David C. Chhieng, Gene P. Siegal, 2007-05-31 by CDs but we continue to utilize the same general format of morning didactics and afternoon glass slide review and small group interactions. One of our biggest successes was in the ever expanding set of didactic lecture notes and radiologic gross microscopic ultrastructural and other images that course participants received so it wasn't much of a surprise when we were approached by the publisher to consider creating an updated compilation of some of the best talks and packaging them in a monograph available to a broader population of physicians and scientists. With the extraordinary attention to detail that he is known for, my co-editor David Chhieng has been both the brains and the brawn of this project, resulting in the bringing together of such a collection while trying to be sensitive and representative of the various branches of pathology reflected in the actual course. From surgical pathology chapters cover select topics in endocrine, gynecologic, GU, and GI pathology with contributions from Walter Bell, Michael Conner, Katrin Klemm, and Audrey Lazenby respectively, Tom Winokur has begun to prepare us for the near future with a treatise on molecular markers in breast cancer. The interactive nature of cytopathology and surgical pathology are brought together by Claudia Castro, now at the U.T. Medical Branch at Galveston, and David Chhieng in three chapters covering mediastinal, pleural, and pulmonary pathology.
