Psychiatric Mental Health Nursing Journal:

Key Debates in Psychiatric/Mental Health Nursing John R Cutcliffe, Martin Ward, 2006-10-12 This book is unique because no other psychiatric mental health nursing text has ever brought together opposing or contrasting views of the same issue and subsequently invited two separate chapters to be written in order to articulate the different perspectives in the debate. Further, no book has then followed up such a wide and thorough discussion by inviting a third party to offer commentary. The purpose of this book is to present a range of key issues that psychiatric mental health nurses face. They are practice, policy, research, and education related issues. The purpose then is to present the most complete, balanced arguments possible in order to inform, educate, and stimulate psychiatric mental health nurses. Furthermore, the purpose of the book is to make psychiatric mental health nurses more aware of the often uncertain nature of much of psychiatric mental health nursing practice and knowledge. Psychiatric mental health nursing is not characterised by black and white, easily delineated issues and is perhaps characterised by various shades of grey. Indeed, it is often stated as axiomatic that psychiatric mental health nurses can be described as a broad church. Consequently, the purpose of this book is to help psychiatric mental health nurses appreciate this broad church, be able to understand the various shades of grey, be able to understand that often there are differing views, inconclusive arguments, and contentious debates, and for this to influence their clinical practice. As the international range of contributors illustrates, these debates to a greater or lesser extent are issues and debates that psychiatric mental health nurses face the world over; these are matters of real international importance and significance. These issues have been touched upon and to a limited extent debated at psychiatric mental health nursing conferences and to an even lesser extent within some psychiatric mental health nursing journals. Thus, they are real issues that many nurses are facing. Talking about and trying to resolve key debates are presented with arguments from opposing viewpoints followed by a third party commentary to give readers the necessary information to form their own view, written by a range of international authors from different countries across three continents. One of the first psychiatric mental health nursing books to explore the pedagogical value of debate. Psychiatric-Mental Health Nursing Jeffrey Schwab Jones, Joyce J. Fitzpatrick, Vickie L. Psychiatric and Mental Health Nursing in the UK Katie Evans, Debra Nizette, Anthony O'Brien, Catherine Johnson, 2019-06-28 Psychiatric and Mental Health Nursing in the UK is an adaptation of Australia and New Zealand's foremost mental health nursing text and is an essential resource for both mental health nursing students and qualified nurses. Thoroughly revised and updated to reflect current research and the UK guidelines as well as the changing attitudes about mental health, mental health services, and mental health nursing in the UK. Set within a recovery and patient framework, this text provides vital information for approaching the most familiar disorders, mental health nurses and students will see in clinical practice, along with helpful suggestions about what the mental health nurse can say and do to interact effectively with patients and their families. Gives readers a thorough grounding in the theory of mental health.
