Protocol Field Manual:

The Doctor's Protocol Field Manual David Eifrig, 2013 Salmonid Field Protocols Handbook David H. Johnson, 2007

This is the first publication to collect, standardize and recommend a scientifically rigorous set of field protocols for monitoring and assessing salmon and trout populations. Includes five additional techniques that can be used with any of the 13 principle methods to supplement information gathered. Over four dozen fisheries experts throughout the U.S. Pacific Northwest and beyond contributed their time to pick, write and review the most reliable protocols for enumerating salmonids in the field. Presented in an easy to use format, each of the 18 peer reviewed protocols covers objectives, sample design, data handling, personnel and operational requirements and field and office techniques including survey forms. Standardized monitoring protocols will improve data reliability, maximize opportunities for data sharing and data set comparability and ultimately improve the ability to assess status and trends. The Handbook will also support consistency in data collection for salmonids at the international level. Field Manuals United States. War Department, 1976-04

2 Homeland Security Austere Emergency Medical Support AEMS Field Guide. The following protocols outline the emergency medical support that can be administered under austere conditions by emergency medical services (EMS) providers credentialed by the Department of Homeland Security, DHS Office of Health Affairs (OHA). These protocols are intended to supplement the DHS OHA Basic Life Support (BLS) and Advanced Life Support (ALS) protocols when providers are operating in austere environments. The protocols guide the management of individual patients while considering the circumstances under which patient evaluation and treatment may occur. Any given patient may require the use of a single protocol, a portion of a protocol or a combination of several protocols. OHA expects that providers will use the protocols to assess and to establish a treatment plan for each patient.
