**Economics Of Environment, Climate Change, And Wine: Selected Papers Of Robert N Stavins, Volume 3 (2011-2023)** Robert N Stavins, 2025-04-29 Robert N Stavins has been one of the most influential voices in environmental economics and policy over the past three decades. Written by Stavins and his co-authors, the selected articles and essays in this book were originally published in a diverse set of leading scholarly periodicals. They are collected here for the first time. The book begins with an introductory essay where Stavins reflects on the professional path leading to his research and writing, identifying common themes that emerged from his research. This book discusses environmental policy in detail, unpacking policy instruments and scrutinizing both domestic and international policy. Policies are examined in relation to The Paris Agreement. It concludes with a section on wine production and consumption. This is the third volume of Stavins' selected papers, following Volume 1 (1988-1999) and Volume 2 (2000-2011). Students, scholars, practitioners, and policymakers will find this volume a very valuable and useful addition to their collection. *Economics of Forestry*, 1950 *The Education Gazette of the Province of the Cape of Good Hope* Cape of Good Hope (South Africa). Education Department, 1979 **Politics and Economics of Eric Kierans** John N. McDougall, 1993-11-02 McDougall believes that study of Kierans' career is important for two reasons: Kierans not only combined practical business and governmental experience with a coherent economic and philosophical outlook but also maintained a comprehensive and integrated approach to the major issues in Canadian politics: national unity, economic independence, federal-provincial relations, regional development, resource policy, and macro-economic policy. McDougall examines Kierans' career from his appointment as president of the Montreal Stock Exchange in 1960 to his service as chairman of the Nova Scotia commission on the Charlottetown Accord during the early 1990s. He focuses on Kierans' relationship with René Lévesque in the government of Jean Lesage, his fights within the Trudeau cabinet over the reform of the post office and the development of the Anik satellite, and his criticisms of Canadian economic and resource policies in the 1970s. Using Kierans' ministerial and personal records, his publications and speeches, interviews with him and his former associates, and a variety of secondary sources, the author argues that much of what Kierans said and accomplished is unique and remains relevant to the economic and political problems of today. Kierans has demonstrated that powerful political forces often prevent good ideas and determined effort from improving public policy, but he has also shown that thoughtful and responsible public service can at least raise the level of public debate. **China** Anjali Kumar, 1994-01-01 World Bank Discussion Paper No. 251 This study investigates the conflicting viewpoints of small and medium size enterprises (SMEs) and banks. The SMEs contend that the supply of bank financing is largely unavailable to them, while banks maintain that lending to these enterprises remains low because of lack of demand. Surveys were conducted among enterprises to assess demand and sources of finance, and financial institutions were interviewed to analyze the reasons for constraints on the supply side. Results show that credit is rarely granted for starting a new business. Thus, the smaller the enterprise, the greater

the equity finance share of the initial investment Evidence also suggests that exploitation of highly profitable opportunities could be accelerated by these enterprises if they had greater access to external financing The study concludes that financial liberalization has had little effect on the access of SMEs to bank credit It explains why banks have shown little interest in developing these enterprises as a market niche and suggests techniques that banks could adopt to overcome lending risks

Agur,2016-09-26 The waning of the commodity boom places renewed emphasis on manufacturing as an engine for Canadian growth However Canadian manufacturing exports have been relatively stagnant since 2000 While the exchange rate depreciation over the past two years has energized export growth the response has not been as strong as would have been expected given the size of the depreciation More fundamental issues appear to be impeding the growth of the Canadian manufacturing sector This study analyzes the structural factors behind export competitiveness by using unique Canadian data on exports which are disaggregated both by province and by product Matching exports to similarly disaggregated data on R D the capital stock and other supply side variables we find that these variables significantly affect export growth beyond the impact of the exchange rate In particular investment in R D capital infrastructure and vocational training improves innovation and production capacity These results are robust to a factor augmented approach that controls for multicollinearity      **Australian national bibliography** ,1961      **Living with Transition in Laos** Jonathan

Rigg,2012-10-12 Laos the Lao People s Democratic Republic is one of the least understood and studied countries of Asia Its development trajectory is also one of the most interesting as it moves from state or perhaps more appropriately subsistence to market Based on extensive original research this book assesses how economic transition and marketisation are being translated into progress or not at the local level and at the resulting impact on poverty inequality and livelihoods It concludes that the process of transition in fact contributes to the growth of poverty for some people and shows how people manage to cope in very unfavourable circumstances      Provincial Strategies of Economic Reform in Post-Mao China Peter T. distinguished list of public choice scholars pursue this approach against a varying backcloth of constitutional issues relevant to the United States Canada Western Europe the transition economies and the third world

**BOOK JACKET Natural Resource Revenues** Anthony Scott, 1976 Debate on the question of who should receive the surplus revenue generated by natural resource exploitation Ottawa or the provinces is usually carried on in terms of history politics custom law social values and environmental considerations This collection of essays presents analyses of the question from the economist's point of view The essays fall into three groups In the first of these the authors examine the taxation of the mining and energy industries and show how the method of taxation chosen by different levels of government federal or provincial may be non neutral distorting private output and timing decisions The second

group consists of careful case studies of the effects of particular natural resource taxation measures the third focuses directly on the question of provincial and federal entitlement to resource revenues Although arguments are advanced for linking the right to tax to the responsibility for management and control at present vested in the provinces most of the contributors would agree that the provinces should be regarded as stewards and bailiffs not landlords as rent collectors and managers not rentiers and owners *Development Centre Studies Economic Opening and Growth in China* Démurger Sylvie, 2000-03-09
