The Digital Social Alpha Possamai-Inesedy, Alan Nixon, 2019-12-02 The edited volume aims to present a critical analysis of the current state of research on religion and belief systems in the realm of the Digital Social The rapid expansion

and democratization of digital technologies in conjunction with the significant shifts taking place within the practices of religion and belief through digital technology demand a critical examination across the social sciences and humanities. These changes call for an overview of not only our current methodological tool box but also the epistemological and ethical considerations that researchers must contend with. The proposed volume provides a critical framework that recognizes that the social and therefore the religious cannot be fully understood without recognizing how the digital world actively constitutes notions such as identity, social networks, embodiment and social institutions. While some specific methods will be discussed, the volume's emphasis remains on the critical epistemological and logistical considerations that are needed when undertaking this form of research.

Peer Pedagogies on Digital Platforms Michael Dezuanni, 2020-09-22. How a popular entertainment genre on YouTube, Let's Play videos created by Minecraft players, offers opportunities for children to learn from their peers. Every day millions of children around the world watch video gameplay on YouTube in the form of a popular entertainment genre known as Let's Play videos. These videos which present a player's gameplay and commentary offer children opportunities for interaction and learning not available in traditional television viewing or solo video gameplay. In this book Michael Dezuanni examines why Let's Play videos are so appealing to children, looking in particular at videos of Minecraft gameplay. He finds that a significant aspect of the popularity of these videos is the opportunity for knowledge and skill exchange. Focusing on Let's Play practices, the videos themselves and fans' responses, Dezuanni argues that learning takes place through what he terms peer pedagogy, a type of nonhierarchical learning that is grounded in the personal relationships fans and players feel toward one another. Moreover, the Let's Play platform is part of a larger digital ecosystem that enables children to learn from one another in unique ways. Dezuanni explores how Let's Players enable learning opportunities, examining digital literacies, the Let's Play genre and peer pedagogies. He then presents case studies of three successful family friendly Let's Players of Minecraft: Stampylonghead, StacyPlays and KarinaOMG, microcelebrities in a microindustry. Dezuanni analyzes the specific practices and characteristics of these players, paying particular attention to how they create
