Integrated Circuit and System Design. Enrico Macii, Vassilis Paliouras, Odysseas Koufopavlou, 2004-08-24. Welcome to the proceedings of PATMOS 2004, the fourteenth in a series of international workshops. PATMOS 2004 was organized by the University of Patras with technical co-sponsorship from the IEEE Circuits and Systems Society. Over the years, the PATMOS meeting has evolved into an important European event where industry and academia meet to discuss power and timing aspects in modern integrated circuit and system design. PATMOS provides a forum for researchers to discuss and investigate the emerging challenges in signal methodologies and tools required to develop the upcoming generations of

integrated circuits and systems We realized this vision this year by providing a technical program that contained state of the art technical contributions a keynote speech three invited talks and two embedded tutorials The technical program focused on timing performance and power consumption as well as architectural aspects with particular emphasis on modelling design characterization analysis and optimization in the nanometer era This year a record 152 contributions were received to be considered for possible presentation at PATMOS Despite the choice for an intense three day meeting only 51 lecture papers and 34 poster papers could be accommodated in the single track technical program The Technical Program Committee with the assistance of additional expert reviewers selected the 85 papers to be presented at PATMOS and organized them into 13 technical sessions As was the case with the PATMOS workshops the review process was anonymous full papers were required and several reviews were received per manuscript
