Pssa Writing Field Test 2014

James Harrison

Pssa Writing Field Test 2014:

High Seas Governance Robert C. Beckman, Millicent McCreath, J. Ashley Roach, Zhen Sun, 2018-11-26 High Seas Governance Gaps and Challenges identifies gaps in and challenges to the existing legal regime in the protection and preservation of the marine environment of the high seas including sensitive marine areas The gaps identified in the book include the failure of liability and compensation schemes to cover pollution of the high seas and the fact that no state has the responsibility to clean up pollution of the high seas One common theme of the book is that it is necessary to identify a state other than flag states port states or coastal states which should have an obligation to exercise jurisdiction and control over certain activities on the high seas **Saving the Oceans Through Law** James Harrison, 2017 The oceans cover more than seventy per cent of the surface of the planet and they provide many vital ecosystem services However the health of the world's oceans has been deteriorating over the past decades and the protection of the marine environment has emerged as one of the most pressing legal and political challenges for the international community An effective solution depends upon the cooperation of all states towards achieving agreed objectives This book provides a critical assessment of the role that international law plays in this process by explaining and evaluating the various legal instruments that have been negotiated in this area as well as key trends in global ocean governance Starting with a detailed analysis of the United Nations Convention on the Law of the Sea the book considers the main treaties and other legal texts that seek to prevent, reduce and control damage to the marine environment caused by navigation seabed exploitation fishing dumping and land based activities as well as emerging pressures such as ocean noise and climate change The book demonstrates how international institutions have expanded their mandates to address a broader range of marine environmental issues beyond basic problems of pollution control to include the conservation of marine biological diversity and an ecosystems approach to regulation It also discusses the development of diverse regulatory tools to address anthropogenic impacts on the marine environment and the extent to which states have adopted a precautionary approach in different maritime sectors Whilst many advances have been made in these matters this book highlights the need for greater coordination between international institutions as well as the desirability of developing stronger enforcement mechanisms for international environmental rules **Marine Protected Areas in International Law** Ingvild Ulrikke Jakobsen, 2016-08-09 Marine Protected Areas in International law an Arctic perspective introduces and analyzes the legal rights and obligations of states under international law using Marine Protected Areas MPAs as a tool to protect marine biodiversity The fragile Arctic marine environment is under growing pressure from climate change and the prospect of increasing human activity affecting previously untouched areas The conservation of Arctic marine biodiversity is a pressing and global concern not least because the melting of sea ice will have widespread effects By analyzing regional cooperation through the OSPAR Convention and under the Arctic Council Jakobsen examines the implementation of the global legal framework for biodiversity protection and conservation in the Arctic The

book has a particular focus on the possibilities of the states to regulate shipping within the MPAs as the increasing shipping activities represent a major threat to the sensitive marine Arctic

Research Handbook on International Marine Environmental Law Rosemary Rayfuse, 2015-10-30 This authoritative Handbook examines the current state of and the future challenges for international law in addressing the key activities that pose threats to the marine environment It provides a critical analysis of and constructive solutions for the international legal regime for the protection of the marine environment and identifies areas of vital research need for the future The in depth chapters written by emerging and established experts in their fields explore the legal framework for protection of the marine environment and look at issues such as pollution seabed activities and climate change as well as discussing the protection of marine biodiversity and considering regional approaches to the protection of the marine environment Each chapter goes beyond a survey of existing law to identify the shortcomings in the legal regime and areas of critical research needed to address these shortcomings This timely book provides significant insights into contemporary issues surrounding the efficacy of the regime created by the 1982 Law of the Sea Convention and details the further work needed to ensure the design and implementation of effective regulation and management of human activities that affect the marine environment Students and academics researching in the law of the sea and environmental law will find the Handbook central to their subject areas The analyses and reform proposals are an invaluable resource for government and policy practitioners as well as IGOs and NGOs involved in marine environmental issues

Sustainability in the Maritime Domain Angela Carpenter, Tafsir M. Johansson, Jon A. Skinner, 2021-05-29 This volume explores options for a sustainable maritime domain including maritime transportation such as Maritime Spatial Planning MSP maritime education and training maritime traffic and advisory systems maritime security Other activities in the maritime domain covered in the book include small scale fisheries and sustainable fisheries and greening the blue economy The book aims to provide the building blocks needed for a framework for good ocean governance a framework that will serve through the next decade and hopefully well beyond the 2030 milestone of the UN Agenda for Sustainable Development In short this book brings together the problems of the current world and sustainable solutions that are in the development process and will eventually materialize in the not so distant future Additionally the book presents a trans disciplinary analysis of integral sustainable maritime transportation solutions and crucial issues relevant to good ocean governance that have recently been discussed at different national regional and international fora highlighting ongoing work to develop and support governance systems that facilitate industry requirements and meet the needs of coastal states and indigenous peoples of researchers of spatial planners and of other sectors dependent on the oceans The book will be of interest to researchers across many disciplines especially those that are engaged in cross sectoral research and developments in the maritime transport sector and across the wider maritime domain To this end the book covers areas including natural and social sciences geographical studies spatial planning maritime security and gender studies as they

relate to transport and the wider maritime sector In addition the book explores frameworks for sustainable ocean governance being developed under the UN s Agenda for Sustainable Development to 2030 It will also look beyond the 2030 milestone under that Agenda and will be of use to national and international policymakers and practitioners government actors at the EU and other regional and national levels and to researchers of ocean governance sustainability and management and maritime transport

Unconventional Lawmaking in the Law of the Sea Natalie Klein,2022 Unconventional Lawmaking in the Law of the Sea explores the ways that actors operating at the international level develop standards of behaviour to regulate varied maritime activities beyond traditional lawmaking This soft law is now prolific in ocean governance so it is vital to consider its significance for the law of the sea

International Law of Sharks Erika J. Techera,Natalie Klein,2017-04-18 In International Law of Sharks Erika J Techera and Natalie Klein provide an in depth analysis of the current legal frameworks that relate to these important species The authors offer ways in which to overcome obstacles that prevent existing laws from working better and identify best practice global governance options while highlighting opportunities for legal reform Scientific evidence indicates that sharks play a critical role in maintaining marine ecosystem health yet current governance regimes have not been effective and many shark species continue to diminish In this context effective laws are critical to improve sharks conservation status This volume also explores the broader relevance of oceans governance by identifying appropriate legal frameworks and regulatory mechanisms that balance conservation and utilisation of marine species in general

Challenges and Opportunities in Regional Governance of Ocean Ecosystems Lucia Fanning,Sebastian Unger,Robin Mahon,2022-09-19

Sustainable Shipping in a Changing Arctic Lawrence P. Hildebrand,Lawson W. Brigham,Tafsir M. Johansson,2018-08-11 This volume brings together multiple perspectives on both the changing Arctic environment and the challenges and opportunities it presents for the shipping sector It argues for the adoption of a forward looking agenda that respects the fragile and changing Arctic frontier With the accelerated interest in and potential for new maritime trade routes commercial transportation and natural resource development the pressures on the changing Arctic marine environment will only increase The International Maritime Organization Polar Code is an important step toward Arctic stewardship This new volume serves as an important guide to this rapidly developing agenda Addressing a range of aspects it offers a valuable resource for academics practitioners environmentalists and affected authorities in the shipping industry alike

Prevention of Pollution of the Marine Environment from Vessels Md Saiful Karim, 2014-11-06 This book examines the role of The International Maritime Organization IMO in the prevention and control of pollution of the marine environment from vessels with a particular reference to the current north south tensions regarding the strategy for combating climate change in the maritime sector as well as the prevention of marine pollution from the ship breaking industry The IMO a United Nations specialized agency has been entrusted with the duty to provide machinery for cooperation among governments for the prevention and control of pollution of the marine environment from vessels The organization is responsible for drafting legal instruments as well as for facilitating technical cooperation for the protection of the marine environment Although IMO legal instruments are mainly targeted at the prevention of pollution of the marine environment from vessels there is a trend towards a liberal

interpretation of this and the organization has expanded its work to areas like shipbreaking which is essentially a land based industry **The IMLI Treatise On Global Ocean Governance** David Joseph Attard, Rosalie P Balkin, Donald W

Greig, 2018-07-11 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically With seemingly no opportunity for revision due to the Conventions burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans The volume examines how the IMO with 171 Member States and 3 Associated Members has and continues to promote the goals of safe secure sound and efficient shipping on clean oceans It studies the interface and interaction between UNCLOS and IMO instruments and how IMOs safety security and environmental protection conventions have contributed to global ocean governance including the peaceful order of the polar regions **Beyond the Classroom**
