Big Dreams Kelly Bulkeley, 2016-03-02 Big dreams are rare but highly memorable dream experiences that make a strong and lasting impact on the dreamer s waking awareness Moving far beyond I forgot to study and the finals are today and other common scenarios such dreams can include vivid imagery intense emotions fantastic characters and an uncanny sense of being connected to forces beyond one s ordinary dreaming mind In *Big Dreams* Kelly Bulkeley provides the first full scale cognitive scientific analysis of such dreams putting forth an original theory about their

formation function and meaning Big dreams have played significant roles in religious and cultural history but because of their infrequent occurrence and fantastical features they have rarely been studied in light of modern science We know a great deal about the religious manifestations of big dreams throughout history and around the world but until now that cross cultural knowledge has never been integrated with scientific research on their psychological roots in the brain mind system In Big Dreams Bulkeley puts a classic psychological thesis to the scientific test by clarifying and improving it with better data sharper analysis and a broader evolutionary framework He brings evidence from multiple sources shows patterns of similarity and difference questions prior assumptions and provides predictive models that can be applied to new sets of data The notion of a connection between dreaming and religion has always been intuitively compelling Big Dreams transforms it into a solid premise of religious studies and brain mind science Combining evidence from religious studies psychology anthropology evolutionary biology and neuroscience Big Dreams makes a compelling argument that big dreams are a primal wellspring of religious experience They represent an innate neurologically hard wired capacity of our species that regularly provokes greater self awareness creativity and insight into the existential challenges and spiritual potentials of human life

Discourse, conversation and argumentation: Theoretical perspectives and innovative empirical studies, volume II Antonio Bova,Lise Haddouk,Carlo Galimberti,Francesco Arcidiacono,2023-06-22 **Engineering Psychology and Human Performance** Christopher D. Wickens,William S. Helton,Justin G. Hollands,Simon Banbury,2021-09-27 Forming connections between human performance and design this new edition of Engineering Psychology and Human Performance examines human machine interaction The book is organized directly from a psychological perspective of human information processing and chapters correspond to the flow of information as it is processed by a human being from the senses through the brain to action rather than from the perspective of system components or engineering design concepts Upon completing this book readers will be able to identify how human ability contributes to the design of technology understand the connections within human information processing and human performance challenge the way they think about technology s influence on human performance and show how theoretical advances have been or might be applied to improving human machine interactions This new edition includes the following key features A new chapter on research methods Sections on interruption management and distracted driving as cogent examples of applications of engineering psychology theory to societal problems A greatly increased number of references to pandemics technostress and misinformation New applications Amplified emphasis on readability and commonsense examples Updated and new references throughout the text This book is ideal for psychology and engineering students as well as practitioners in engineering psychology human performance and human factors The text is also supplemented by online resources for students and instructors *Navigating Friendships in Interaction* Cade Bushnell,Stephen J. Moody,2023-12-14 Bushnell and Moody present a rich investigation into the navigation of friendships adopting discursive and ethnographic perspectives to examine Japanese Chinese Korean and English

interactional data Since the definition of friendship is hard to pin down most sociocultural anthropologists have tended to focus on issues of kinship and descent while leaving friendship as a residual or interstitial issue However this book puts friendship as the central focus and offers unique perspectives from the participants themselves The interactional work implicated in the accomplishment of making and being friends and the trials and tribulations of friendship are both explored through the many detailed analyses showing how the participants navigate the calm and rough waters of friendship in and through their everyday interactions Researchers undergraduates and postgraduate students in the fields of conversation analysis pragmatics and other social sciences will benefit from the real life examples in the book as well as the analysis
