Encyclopedia of Research Design Neil J. Salkind, 2010-06-22. Comprising more than 500 entries, the Encyclopedia of Research Design explains how to make decisions about research design, undertake research projects in an ethical manner, interpret and draw valid inferences from data, and evaluate experiment design strategies and results. Two additional features carry this encyclopedia far above other works in the field: bibliographic entries devoted to significant articles in the history of research design and reviews of contemporary tools such as software and statistical procedures used to analyze results. It covers the spectrum of research design strategies from material presented in introductory classes to topics necessary in graduate research; it addresses cross and multidisciplinary research needs with many examples drawn from the social and behavioral sciences, neurosciences, and biomedical and life sciences; it provides summaries of advantages and disadvantages of often used strategies and it uses hundreds of sample tables, figures, and equations based on real life cases. What Drives Prices in Egypt? Hanaa Kheir-El-Din, 2009-10-01. Since 2004, economic reforms in Egypt have led to robust expansion, a healthy external position, and enhanced investor confidence. But despite these positive macroeconomic developments, inflation has been steadily rising. Does fiscal policy threaten price stability? Does wage growth in the Egyptian economy lead to price inflation, or is it the reverse? In this volume, these and other questions are examined by contributors who participated in a conference held in Cairo in late 2007. Here is a coherent and comprehensive analysis of the factors driving prices in Egypt in an attempt to find a satisfactory balance between prices and economic growth. While Egypt is the focus of the analysis, the papers draw upon the relevant literature and international experience; the findings can be applied to other middle income economies. This timely study helps to explain the complex issues facing economists and
