Magnetic Resonance Imaging, 1988 **Essays on Roberto**

Gerhard Monty Adkins, Michael Russ, 2017-03-07 For much of the mid twentieth century Roberto Gerhard found himself an outsider He was airbrushed from much writing on contemporary music in Spain during the Franco regime and was known in England more for his commercial music for theatre film and radio than his concert works However his significance as a musical innovator in developing serial technique and in the field of electro acoustics is now being gradually recognised in both Spain and England as well as further afield The volume explores an extensive range of Gerhard's work from the early Wind Quintet and the Spanish ballets Pandora and Don Quixote with their overt political overtones through to the late period Metamorphoses and a newly discovered chance based composition Claustrophilia written in response to a request by John

Cage for his book *Notations* One of the key themes presented throughout the book is Gerhard's innovative use of serialism Gerhard's development of Schoenberg's technique led him to explore the serialization of both pitch and time This volume suggests evidence for the first time that situates Gerhard's idiosyncratic experiments alongside rather than after the total serialist works of his European counterparts Pierre Boulez Olivier Messiaen and Karlheinz Stockhausen **Index of**
