the early twenty first century ideologies of evidence based management meant that reform efforts to change the purpose of prisons from punishment to rehabilitation through vocational education required evidence to justify policy prescriptions Yet who determines what constitutes evidence In political environments solutions are typically pre conceived which means that the nature of the evidence collected is also preconceived As a result key assumptions about outcomes are often wished away to show improvement and be accountable Through a detailed analysis interspersed with stories from the authors experiences behind the wall among California s prison population the authors challenge the nature of evidence based research as used in the prison environment In the process they describe the thorny problems facing reformers Prison Suicide Lindsay M. Hayes,1998-12 Until recently it has been assumed that suicide although a problem for jail inmates as they face the initial crisis of incarceration is not a significant problem for inmates who advance to prison to serve out their sentences This monograph was produced to fill a critical void in the knowledge base about prison suicide In addition to a through review of the literature and of national and state standards for prevention it offers the most recent national data on the incidence and rate of prison suicide effective prevention programs and discussion of liability issues References appendices and tables

Encyclopedia of Community Corrections

Shannon M. Barton-Bellessa,2012-05 In response to recognition in the late 1960s and early 1970s that traditional incarceration was not working alternatives to standard prison settings were sought and developed One of those alternatives community based corrections had been conceived in the 1950s as a system that might prove more progressive humane and effective particularly with people who had committed less serious criminal offenses and for whom incarceration with constant exposure to serious offenders and career criminals might prove more damaging than rehabilitative The alternative of community corrections has evolved to become a substantial part of the criminal justice and correctional system spurred in recent years not so much by a progressive humane philosophy as by dramatically increasing prison populations court orders to fix overextended prison settings and an economic search for cost savings Encyclopedia of Community Corrections explores all aspects of community corrections from its philosophical foundation to its current inception Features a thematic reader s guide in the front matter groups entries by broad topical or thematic areas to make it easy for users to find related entries at a glance a chronology in the back matter helps students put individual events into broader historical context a glossary provides students with concise definitions to key terms in the field a resource guide to classic books journals and web sites along with the further readings accompanying each entry guides students to further resources in their research journeys and appendix offers statistics from the Bureau of Justice

Toward Justice Kristi Holsinger,Lori Sexton,2017-03-16

Designed as a text for Criminal Justice and Criminology capstone courses Toward Justice encourages students to engage critically with conceptions of justice that go beyond the criminal justice system in order to cultivate a more thorough understanding of the system as it operates on the ground in an imperfect world where people aren t always rational actors where individual cases are linked to larger social problems and where justice can sometimes slip through the cracks Through a combined focus on content and professional development Toward Justice helps students translate what they have learned in the classroom into active strategies for justice in their professional lives preparing them for careers that will not simply maintain the status quo and stability that exists within our justice system but rather challenge the system to achieve justice
