

5th grade FCAT 2.0 Science Study Guide

THE NATURE OF SCIENCE!

- 1.) 3 types of scientific investigations: a controlled experiment, repeated observations, or making a model
- 2.) A control group is used to compare the test group (the group with "treatment") to a control group with no "treatment" to see if the "treatment" in fact made a change. A control group is very important to the design of an experiment to be sure that what you are testing is actually working as suspected. For example, if you wanted to know which laundry detergent works best. You would have two types of detergent. You would control the type of fabric, the stain, the amount of time the stain sat in, the temperature of the water, the amount of time the stain is scrubbed, etc.. You would also have a control group. This group would get NO detergent so you could see if detergent actually worked better than water alone with no detergent.
- 3.) It's very important for scientists to write down EVERY step of an investigation so they can repeat it for repeated trials so their results are reliable, AND so other scientists can REPLICATE their experiment. [Replicate means to repeat an experiment AND get similar or the same results.] Scientists repeat and replicate experiments of others to test validity and reliability. The more often an experiment can be replicated, the more accepted the findings.
- 4.) When you gather information about the real world through the use of your senses you are gathering observations!

Mocombe's Reading Room Series Curriculum Paul C. Mocombe,2020-09-04 This work explores the concept of structural reproduction and differentiation through the origins of and basis for Paul C Mocombe s Mocombeian Strategy 2005 and Reading Room Curriculum published as Mocombe s Reading Room Series 2007 It highlights how black American practical consciousness and the academic achievement gap are a product of capitalist forces relations of production and their ideological apparatuses As such it is argued here that to resolve the gap black Americans should be treated as immigrant students against their structurally differentiated identities **Language, Literacy, and Pedagogy in Postindustrial**

Societies Paul C. Mocombe,Carol Tomlin,2013 In postindustrial economies such as the United States and Great Britain the black white achievement gap is perpetuated by an emphasis on language and language skills with which black American and black British Caribbean youths often struggle This work analyzes the nature of educational pedagogy in the contemporary capitalist world system under American hegemony Mocombe and Tomlin interpret the role of education as an institutional or ideological apparatus for capitalist domination and examine the sociolinguistic means or pedagogies by which global and local social actors are educated within the capitalist world system to serve the needs of capital i e capital accumulation Two specific case studies one in the United States and one in the United Kingdom are utilized to demonstrate how contemporary educational emphasis on language and literacy parallels the organization of work and contributes to the debate on academic underachievement of black students vis a vis their white and Asian counterparts **Structuring Learning Environments**
