A Reader's Guide to the Narrative and Lyric Poetry of Thomas Lovell Beddoes Rodney Edgecombe, 2015-10-05 Beddoes poses a peculiar problem for critics and scholars who wish to redress the marginal position that he occupies in the Romantic canon a problem seemingly unique to him and created in part by his misconception of his own strengths as a writer An extremely good poet who had things turned out differently might have functioned as a missing link between Keats and Tennyson he fatally divided his attention between verse and medicine a discipline that by his own admission made in the poem composed for Zo King served to wither his creative gift This fission of energy was bad enough but more damaging still was his misconception of metier for whatever mental resources remained to Beddoes after gruelling days in the classroom he invested in writing an unstageable drama instead of in his primary gift for lyric verse Whereas the Beddoes revival that has been gathering momentum in recent years has centred on Death's Jest Book the play onto which the poet directed some might say misdirected so much of his creative energy this study focuses wholly on his lyric and narrative verse much of which has received short critical shrift It follows the sequence of poems set out in the Donner edition and focuses on their verbal richness and inventiveness as they unspool upon the page

Guide to Effective Monitoring of Aquatic and Riparian Resources, 2004 This monitoring plan for aquatic and riparian resources was developed in response to monitoring needs addressed in the Biological Opinions for bull trout U S Department of the Interior Fish and Wildlife Service 1998 and steelhead U S Department of Commerce National Marine

Fisheries Service It provides a consistent framework for implementing the effectiveness monitoring of aquatic and riparian resources within the range of the Pacific Anadromous Fish Strategy PACFISH and the Inland Fish Strategy INFISH The primary objective is to evaluate the effect of land management activities on aquatic and riparian communities at multiple scales and to determine whether PACFISH INFISH management practices are effective in maintaining or improving the structure and function of riparian and aquatic conditions at both the landscape and watershed scales on Federal lands throughout the upper Columbia River Basin A list of attributes thought to be important in defining aquatic and riparian habitat conditions and their relationship with listed species were identified The list of attributes was then translated into measurable criteria and compiled to form sampling protocols for both stream channel parameters Part II and vegetation parameters Part III These sampling methods were tested for variability and the results are documented in two other publications Testing Common Stream Sampling Methods for Broad Scale Long Term Monitoring Archer and others 2004 and The Repeatability of Riparian Vegetation Sampling Methods How Useful Are These Techniques for Broad Scale Monitoring Coles Ritchie and others in preparation
