Fundamentals and Simplified Principles of Economics Gezahagn Kudama,2019-12-04 Document from the year 2019 in the subject Economics Other grade University Wollega University language English abstract Several people imagine that economics is about money In fact this is true to some extent this is true since economics has a lot to do with money with how much money people are paid how much they spend what it costs to buy various items how much money firms earn how much money there is in total in the economy Even if the large number of areas in which our lives are concerned with money economics is more than just the study of money Sloman 2006 In general the subject matter of economics is generally divided into four parts They are Production Consumption Exchange and Distribution Production means producing things or creation or addition of utilities to the goods and services to make them capable of satisfying various wants Consumption deals with human wants and their satisfaction Exchange refers to transfer of goods and services through the medium of money Finally distribution refers to the sharing of income from production by four factors of production namely land labor capital and organization Sloman 2006 The Microeconomics Anti-Textbook Rod Hill,Tony Myatt,2021-12-02 Mainstream textbooks

present economics as an objective science free from value judgements The Microeconomics Anti Textbook demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives In this fully updated and expanded edition of their celebrated book Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti text analysis and critique Challenging the assumptions arguments and models Hill and Myatt provide the essential guide to decoding the textbooks and show that real economics is far more interesting and subversive than the simplistic version presented to students

Meaningful Economics Bart J. Wilson,2024 Economics has a problem the discipline cannot distinguish the causes of human action from the consequences of human action Economists deal with matters of fact not with feelings and morals They model representations of optimal agents not flesh and blood human beings in ordinary life By assuming that incentives and self interest are sufficient to explain economic activity economic science proceeds as if the human mind does not matter But the origins of our actions ideas do indeed matter They make us human In Meaningful Economics Bart J Wilson challenges economics to directly engage human beings as we really are not as economists ideally assume Wilson argues that economic science is as much about purposes and human values as it is about incentives Moreover he shows how the outcomes of our decisions costs and benefits and the origins of our decisions motives and goals can be understood in an integrated way Over the course of the book Wilson develops a framework that connects the origins of human action to the outcomes of human action explaining human conduct with causes and effects He then shows how three basic principles of economics trade specialization and property require meaning values and purpose With a fresh perspective and a novel theoretical framework that bridges economics and ethics Meaningful Economics explains the roots of human conduct and its economic effects by grounding a science of economics in the moral sentiments that prompt human beings to act

Elliott, 2018-06-26 From The Road to Game of Thrones across works as seemingly different as Gone Girl and Saw literature film and television have become obsessed with the intersection of survival and choice When the trapped rock climber hero of 127 Hours is confronted with self amputation or death it is only a particularly blunt example of an omnipresent set up In real life settings or fantastical games protagonists find themselves confronting extreme scenarios with life or death consequences forced to make torturous either or choices in stripped down brutally stark environments Jane Elliott identifies and analyzes this new and distinctive aesthetic phenomenon which she calls the microeconomic mode Through close readings of its narratives tropes and concepts she traces the implicit theoretical and political claims conveyed by this combination of abstraction and extremity In the microeconomic mode humans isolated from any forms of social organization operate within a mini economy of costs and benefits gains and losses measured in the

currency of life Elliott reads the key concepts that emerge from this aesthetic life interest sovereign capture and binary life in relation to biopolitics and natural law theory becoming and the control society and primitive accumulation in racial capitalism The microeconomic mode interrogates the destruction of the liberal political subject but what it leaves in its place is as disturbing as it is radically new Going beyond the question of neoliberalism in literature The Microeconomic Mode combines revelatory close readings of key literary and popular texts with significant theoretical interventions to identify how an aesthetics of choice has reshaped our contemporary understanding of what it means to be human Austrian Theory and Economic Organization G. Nell, 2014-08-13 The Austrian economic school famously predicted and explained the problems of calculation in a socialist society With their concept of spontaneous order they challenged mainstream economists to look beyond simplified static models and consider the dynamic and evolutionary characteristics of social orders However many feel that Austrians took their victory too far and became ideologically devoted to laissez faire Austrian Theory and Economic Organization is a collection of essays on problems and possibilities in economic organization written by economists and political scientists with an interest in the dynamic and evolutionary nature of market economies Each chapter explores areas of potential agreement between Austrian theory market socialist economics and other heterodox schools of economic and political science The collection aims to bridge cultural and political divisions between free market advocates who stress individual rights and left leaning thinkers who stress social justice and a culture of solidarity **Environmental Economics** Dodo J.
