While a lot of the rubber we use today is made with chemicals by scientists, people originally used rubber from certain plants. The white, milky material is called latex. Several plants produce latex, including dandelions. The next time you break off the flower of a dandelion, look closely. The sticky white liquid in the plant is natural latex.

People find solutions to problems. Since the reinforced rooms often flood, people engineered a great solution to build their houses on stilts. People who live next to the ocean sometimes do this, too. Does your house have a basement? Some places do not have basements because water will seep in from the ground. In flooded cities, people build taller buildings so there's more space for people.

To Discuss After the Read

- Where do you live, and what solutions have people engineered in your area?
- Open places have windstorms, snowy places have deeper roads, etc.

pp. 28-29

Some words use multiple spellings. Gargantuan is spelled in at least four different ways. As we use words, we "vote" for which version we would like to see used more often. Over time, language changes to match what people say.

Conservation is important, and being animal species is not good. But food and resources are also helpful to us. This is a great opportunity to begin to talk about this important topic and comparing needs and wants. Where do you stand on all this, and what do you do to help make the world a better place? If your children are interested, this is a great opportunity to learn more.

100 Top Picks for Homeschool Curriculum Cathy Duffy, 2005 A critical volume for the homeschooling community that helps parents make informed choices regarding learning styles and curriculum

Teaching Numeracy Margie Pearse, K. M. Walton, 2011-03-23 Do some of your students arrive at wildly wrong answers to mathematical problems but have no idea why? If so, they are not alone. Many students lack basic numeracy: the ability to think through the math logically, solve problems, and apply it outside of the classroom. This book outlines nine critical thinking habits that foster numerate learning and details practical ways to incorporate those habits into instruction. Referencing the new common core standards, NCTM standards, and established literacy practices, the authors include how to use this in my math class tomorrow, applications throughout the book which show you how to monitor and repair students' understanding, guide students to recognize patterns, represent mathematics non-linguistically, encourage questioning for understanding, develop students' mathematics vocabulary, create a collaborative environment. Latter chapters show how to develop numeracy-rich lesson plans and provide several ready-to-use models with clear directions and student handouts. The book's practices, activities, and problems will help you move your students from simply doing the math to a deeper understanding of how to think through the math.

The Well-Trained Mind: A Guide to Classical Education at Home (Third Edition) Susan Wise Bauer, Jessie Wise, 2009-05-04 You do have control over what and how your child learns. The Well-Trained Mind will give you the tools you'll need to teach your child with confidence and success.

So You're Thinking About Homeschooling: Second Edition Lisa Whelchel, 2009-02-19 Discover the Diversity of Homeschooling. Confused and intimidated by the complexities of homeschooling, many parents assume it could never work for them. Now an updated edition of *So You're Thinking About Home Schooling* by Lisa Whelchel herself, a homeschooling mother of three, introduces to readers fifteen composite portraits of homeschooling families who show how every family can successfully face the unique challenges of its situation. The story-based approach deals with common questions of time management, teaching weaknesses, and outside responsibilities, as well as children's age variations, social and sports involvement, learning disabilities, and boredom. Seeing a wide variety of homeschooling families in action gives parents the information and confidence they need to make their own decisions about home-based education. Includes a new chapter from Lisa and an all-new resource guide with recommendations from real-life homeschooling families.

I'm Thinking About Homeschooling You're also probably thinking, "But can I really teach my children? Where do I start? What if I need to work outside the home? Must I have twelve children, raise goats, and bake my own bread? And what about socialization?" I could tell you the answers to these questions, but I would rather show you. Beginning with my own, I want to introduce you to fifteen families in fifteen unique situations who have all chosen to homeschool for different reasons, using a variety of learning methods. So let's rap lightly on the homeschool door and peek inside before we decide if we are ready to move in.

Story Behind the Book My hope is that by the end of the

book and a stroll through the neighborhood you will feel more confident as you identify a family situation and teaching method that resonates with your personality and philosophy of education From there you can simply look to the end of each chapter to find a sample schedule for the homeschool day and list of curriculum suggestions for that particular teaching method Lisa _____ Deciding if
