**Reclaiming Dissent**, 2009-01-01 Reclaiming Dissent is a unique collection of essays that focus on the value of dissent for the survival of democracy in the United States and the role that education can play with respect to this virtue The various contributors to this volume share the conviction that the vitality of a democracy depends on the ability of ordinary citizens to debate and oppose the decisions of their government Yet recent history in the United States suggests that dissent is discouraged and even suppressed in the political cultural and educational arenas Many Americans are not even aware that democracy is not primarily about voting every four years or majority rule but about actively participating in public debates and civic action This book makes a strong case for the need to reclaim a tradition in the United States like the one that existed during the Civil Rights Era in which dissent opposition and conflict were part of the daily fabric of our democracy

Teacher educators teacher candidates new teachers and educators in general can greatly benefit from reading this book

[Building School 2.0](#) Chris Lehmann, Zac Chase, 2015-09-08 Ninety five propositions for creating more relevant more caring schools There is a growing desire to reexamine education and learning Educators use the phrase school 2 0 to think about what schools will look like in the future Moving beyond a basic examination of using technology for classroom instruction Building School 2 0 How to Create the Schools We Need is a larger discussion of how education learning and our physical school spaces can and should change because of the changing nature of our lives brought on by these technologies Well known for their work in creating Science Leadership Academy SLA a technology rich collaborative learner centric school in Philadelphia founding principal Chris Lehmann and former SLA teacher Zac Chase are uniquely qualified to write about changing how we educate The best strategies they contend enable networked learning that allows research creativity communication and collaboration to help prepare students to be functional citizens within a

modern society Their model includes discussions of the following key concepts Technology must be ubiquitous necessary and invisible Classrooms must be learner centric and use backwards design principles Good technology can be better than new technology Teachers must serve as mentors and bring real world experiences to students Each section of Building School 2.0 presents a thesis designed to help educators and administrators to examine specific practices in their schools and to then take their conclusions from theory to practice Collectively the theses represent a new vision of school built off of the best of what has come before us but with an eye toward a future we cannot fully imagine
