The Age Of Discovery English Edition:

The Age of Discovery, 1400-1600 David Arnold, 2013-09-27 The Age of Discovery explores one of the most dramatic features of the late medieval and early modern period when voyagers from Western Europe led by Spain and Portugal set out across the world and established links with Africa Asia and the Americas This book examines the main motivations behind the voyages and discusses the developments in navigation expertise and technology that made them possible This second edition brings the scholarship up to date and includes two new chapters on the important topics of the idea of discovery and on biological and environmental factors which favoured or limited European expansion Inventing Americans in the Age of Discovery Michael Householder, 2016-05-06 Inventing Americans in the Age of Discovery traces the linguistic rhetorical and literary innovations that emerged out of the first encounters between Europeans and indigenous peoples of the Americas Through analysis of six texts Michael Householder demonstrates the role of language in forming the identities or characters that permitted Europeans English speakers primarily to adapt to the unusual circumstances of encounter Arranged chronologically the texts examined include John Mandeville's Travels Richard Eden's English language translations of the accounts of Spanish and Portuguese discovery and conquest George Best's account of Martin Frobisher's voyages to northern Canada Ralph Lane's account of the abandonment of Roanoke John Smith's writings about Virginia and John Underhill's account of the Pequot War Through his analysis Householder reveals that English colonists did not share a universal homogenous view of indigenous Americans as savages but that the writers confronted by unfamiliar peoples and situations resorted to a mixed array of cultural beliefs myths and theories to put together workable explanations of their experiences which then became the basis for how Europeans in the colonies began transforming themselves into Americans

English Musicians in the Age of Exploration Ian Woodfield, 1995 When Drake set sail from Plymouth harbour on 15 November 1577 at the start of his epic circumnavigation of the world he had with him on board the Pelican four professional musicians and at least one trumpeter from the Introduction The three epoch making voyages of Columbus 1492 Vasco da Gama 1497 and Magellan 1519 inaugurated the Age of Exploration the most intensive era of discovery in the history of the world This book seeks to ascertain what part musicians played in the patterns of settlement which still determine many of the cultural and linguistic boundaries of the present day world The focus is on Englishmen but account will be taken of musicians representing the other leading colonial nations of Europe France Spain Portugal and Holland This study deals with the hundreds of musicians who left their native country to serve on long distance ships in the years between the accession of Elizabeth I and the end of the 17th century Among the many subjects covered are musical duties at sea musicians as ambassadors on land musical trinkets for barter musicians of the East India Company musical instruments presented by the trading companies trumpeters drum and fife players amateur musicians musicians in the colonization of North America and much more *The Age of Discovery* Wilcomb E. Casale,2010-02-25 In 1517 the Ottoman Sultan Selim the Grim conquered Egypt and brought his empire for the first time in history into direct contact with the trading world of the Indian Ocean During the decades that followed the Ottomans became progressively more engaged in the affairs of this vast and previously unfamiliar region eventually to the point of launching a systematic ideological military and commercial challenge to the Portuguese Empire their main rival for control of the lucrative trade routes of maritime Asia The Ottoman Age of Exploration is the first comprehensive historical account of this century long struggle for global dominance a struggle that raged from the shores of the Mediterranean to the Straits of Malacca and from the interior of Africa to the steppes of Central Asia Based on extensive research in the archives of Turkey and Portugal as well as materials written on three continents and in a half dozen languages it presents an unprecedented picture of the global reach of the Ottoman state during the sixteenth century It does so through a dramatic recounting of the lives of sultans and viziers spies corsairs soldiers of fortune and women from the imperial harem Challenging traditional narratives of Western dominance it argues that the Ottomans were not only active participants in the Age of Exploration but ultimately bested the Portuguese in the game of global politics by using sea power dynastic prestige and commercial savoir faire to create their own imperial dominion throughout the Indian Ocean Travel Narratives from the Age of Discovery Peter C. Literature in the Age of Celestial Discovery Judy A. Hayden,2016-04-08 The reconfiguration and relinquishing of one s conviction in a world system long held to be finite required for many in the sixteenth and seventeenth centuries a compromise in one s beliefs and the biblical authority on which he or she had relied and this did not come without serious and complex challenges Advances in astronomy such as the theories of Copernicus the development of the telescope and Galileo s discoveries and descriptions of the moon sparked intense debate in Early Modern literary discourse The essays in this collection demonstrate that this discourse not only stimulated international discussion about lunar voyages and otherworldly habitation but it also developed a political context in which these new discoveries and theories could correspond metaphorically to New World exploration and colonization to socio political unrest and even to kingship and regicide
