Mr. David Smith
Personnel Manager
ACME Accountants
3877 Henderson Street
SLC, UT 84044

Dear Mr. Smith:

Thank you for allowing me to visit you yesterday. I realize that this took time away from your regular responsibilities, and I am grateful for all the information that you were about to provide regarding your job at ACME.

Last night, I talked to my family about my experience at ACME. I became more convinced that I want to become an accountant. I am glad you gave us ideas about which classes we should take while in school. I plan to take more math and computer classes next year as you suggested.

Thank you, again, for giving me this valuable learning experience.

Sincerely,

Sam T. Student

Ruggiero, 2013-03-09 Even if the subject is a long standing one this is the first monograph on this field On the one hand this book is intended to give a rather wide review on this field both in a historical and pedagogical perspective on the other hand it aims at critically re examining and discussing the most controversial issues For instance according to some authors the celebrated Sagnac effect is a disproof of the theory of relativity applied to rotating frames according to others it is an astonishing experimental evidence of the relativistic theory In order to give the reader a deeper insight into this research field the contributing authors discuss their opinions on the main subjects in an enthralling virtual round table in this way the reader can get a direct comparison of the various viewpoints on the most controversial and interesting topics This is particularly expedient since the differences in the various approaches are often based upon subtleties that can be understood only by a direct comparison of the underlying hypotheses
