

Tableau Dashboard Quick User Guide

This Quick User Guide provides brief information on how to navigate and interact with Tableau dashboards and charts.

BASIC NAVIGATION

Some dashboards have tabs across the top of the screen, which correspond to different views. Select a tab to move to a different view.

Some dashboards have graphic navigational tools, such as these arrow and icons.

Select a record and/or click the arrow icon to advance to the new page/view.

Click the home icon to return to the designated "home" view.

Display / Hide optional filters

INFORMATIONAL FEATURES

There are several common features available on each dashboard to provide additional information.

To activate, move the cursor on top of the object (hover on it) to display the tooltip text.

The Dashboard hover help describes the dashboard purpose & objective, the primary measure(s), the data sourcing, and related policies or logic. It is always in the top right corner of the dashboard (of varying color)

The blue info icon is used to provide more information about specific element(s) within the dashboard.

UNDERSTANDING CHARTS AND DATA

Charts on the dashboard generally have an interactive "Tooltip" that provides additional and specific data information.

Example: In this small excerpt, the tooltip for the selected chart mark has been activated by hovering the mouse cursor over the dot. The pop-up information box provides the specific count and percentage for this data-point on the chart.

Sometimes additional information is also presented as a chart. This is known as a "Viz in Tooltip".

Here, the yellow bar corresponding to 60+ has been activated, and in addition to the specific data value (893) a chart is shown with a breakdown of more detailed timeframe groups and their respective counts.

Note: Viz in Tooltip content is not interactive. It is view-only additional information.

On some dashboards, a chart may have supporting Viz in Tooltip charts for more detailed information.

This icon identifies Viz in Tooltip content that may be displayed **without** engaging associated chart filters.
