

WIN-PAK® SE with VISTA Integration

Integrated Access Control Solutions

WIN-PAK® SE with VISTA integration is the newest version of Honeywell's most comprehensive access control software. By combining the power of access control, digital video and intrusion into one powerful system, WIN-PAK SE with VISTA integration improves scalability, capability and control.

WIN-PAK SE with VISTA integration provides a single user interface that integrates access control with video and intrusion to create a more robust platform with increased functionality. Functions that have traditionally been tied together through physical relays and input devices are now controlled logically. This simplicity gives users greater control over their systems than they had using multiple software platforms and interfaces.

The ability to connect to remote systems will help dealers reduce service calls and increase response times. By using the direct command control or a virtual keypad, real-time status and control can be deployed without having to send a technician.

This is ideal for monitoring remote sites over long distances, as well as managing multiple sites from a single location. WIN-PAK's integration simplifies the access process by allowing users to arm or disarm the system with a card. Any valid card can disarm the system to prevent false alarms. This is an improvement over a typical non-integrated solution where devices are not aware of what other devices are doing.

Quick Start Reports make WIN-PAK easy to install and program. Installers and end users will find the Quick Start Reports helpful in installation and programming the system. WIN-PAK offers advanced reporting capabilities that customers are demanding. Users can create customized reports or choose from a variety of predefined reports. E-mail capability has been added to allow reports and events to be sent via e-mail. Reports and events can be shown as easy-to-read text that provide all the content and detail that customers require.
