Industrial Parsing of Software Manuals Richard F. E. Sutcliffe,Heinz-Detlev Koch,Annette McElligott,1996 The task of language engineering is to

develop the technology for building computer systems which can perform useful linguistic tasks such as machine assisted translation text retrieval message classification and document summarisation Such systems often require the use of a parser which can extract specific types of grammatical data from pre defined classes of input text There are many parsers already available for use in language engineering systems However many different linguistic formalisms and parsing algorithms are employed Grammatical coverage varies as does the nature of the syntactic information extracted Direct comparison between systems is difficult because each is likely to have been evaluated using different test criteria In this volume eight different parsers are applied to the same task that of analysing a set of sentences derived from software instruction manuals Each parser is presented in a separate chapter Evaluation of performance is carried out using a standard set of criteria with the results being presented in a set of tables which have the same format for each system Three additional chapters provide further analysis of the results as well as discussing possible approaches to the standardisation of parse tree data Five parse trees are provided for each system in an appendix allowing further direct comparison between systems by the reader The book will be of interest to students researchers and practitioners in the areas of computational linguistics computer science information retrieval language engineering linguistics and machine assisted translation [InfoWorld](#) ,1994-02-07 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects [Aimms 3.8 - User's Guide](#) Marcel Roelofs,Johannes Bisschop,2008-01-01 The AIMMS 3 8 User s Guide provides a global overview of how to use the AIMMS system It is aimed at application builders and explores AIMMS capabilities in helping you create a model based application in an easy and maintainable manner The guide describes the various graphical tools that the AIMMS system offers for this task [InfoWorld](#) ,1995-05-29 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Dimensions** ,1977 **Executive Guide to Speech-Driven Computer Systems** Malcolm McPherson,2012-12-06 A new generation of speech driven personal computer systems promises to transform the business use of Information Technology This is not merely a matter of discarding the keyboard but of rethinking business processes to take advantage of the increased productivity that speech driven systems can bring Malcolm McPherson is one of the pioneers of this fast moving field and has been personally involved in the development of systems that have met business needs across many industrial sectors **Symantec Visual Page User's Guide** ,1997 [X Users Guide Motif R5](#) Valerie Quercia,Tim O'Reilly,1993 Orients the new user to Window system concepts and provides detailed tutorials for many client programs including the xterm terminal emulator and window managers This popular manual is available in two editions one for users of the MIT software one for users of Motif Revised for X11 Release 5 and Motif 1 2 [InfoWorld](#) ,1991-01-28 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects [InfoWorld](#) ,1993-03-01 InfoWorld is targeted to Senior IT professionals Content is segmented into
