Computer-Aided Design of User Interfaces III Christophe Kolski, Jean Vanderdonckt, 2012-12-06 Advances in electronics communications and the fast growth of the Internet have made the use of a wide variety of computing devices an every day occurrence These computing devices have different interaction styles input output techniques modalities characteristics and contexts of use Furthermore users expect to access their data and run the same application from any of these devices Two of the problems we encountered in our own work 2 in building VIs for different platforms were the different layout features and screen sizes associated with each platform and device Dan Ol sen 13 Peter Johnson 9 and Stephen Brewster et al 4 all talk about problems in interaction due to the diversity of interactive platforms devices network services and applications They also talk about the problems associated with the small screen size of hand held devices In comparison to desk top computers hand held devices will always suffer from a lack of screen real estate so new metaphors of interaction have to be devised for such devices It is difficult to develop a multi platform user interface VI without duplicating development effort Developers now face the daunting task to build UIs that must work across multiple devices There have been some approaches towards solving this problem of multi platform VI

development including XWeb 14 Building plastic interfaces 5 20 is one such method in which the VIs are designed to withstand variations of context of use while preserving usability

Tools for Working with Guidelines Jean Vanderdonckt, Christelle Farenc, 2012-12-06 This volume contains the papers presented at the International Workshop on Tools for Working with Guidelines TFWWG 2000 held in Biarritz France in October 2000 It is the final outcome of the International Special Interest Group on Tools for Working with Guidelines Human computer interaction guidelines have been recognized as a uniquely relevant source for improving the usability of user interfaces for interactive systems The range of interactive techniques exploited by these interactive systems is rapidly expanding to include multimodal user interfaces virtual reality systems highly interactive web based applications and three dimensional user interfaces Therefore the scope of guidelines sources is rapidly expanding as well and so are the tools that should support users who employ guidelines to ensure some form of usability Tools For Working With Guidelines TFWWG covers not only software tools that designers developers and human factors experts can use to manage multiple types of guidelines but also looks at techniques addressing organizational sociological and technological issues

Working Group 2 7 13 4 has since its establishment in 1974 concentrated on the software problems of user interfaces From its original interest in operating systems interfaces the group has gradually shifted emphasis towards the development of interactive systems The group has organized a number of international working conferences on interactive software technology the proceedings of which have contributed to the accumulated knowledge in the field The current title of the Working Group is User Interface Engineering with the aim of investigating the nature concepts and construction of user interfaces for software systems The scope of work involved is to increase understanding of the development of interactive systems to provide a framework for reasoning about interactive systems to provide engineering models for their development This report addresses all three aspects of the scope as further described below In 1986 the working group published a report Beech 1986 with an object oriented reference model for describing the components of operating systems interfaces The model was implementation oriented and built on an object concept and the notion of interaction as consisting of commands and responses Through working with that model the group addressed a number of issues such as multi media and multi modal interfaces customizable interfaces and history logging However a conclusion was reached that many software design considerations and principles are independent of implementation models but do depend on the nature of the interaction process InfoWorld ,1988-11-21 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects
