Economic Research Centre, 1998 Do roads induce mobility This might sound like a strange question yet it only stands to reason that building new roads or other infrastructure may actually encourage people to use the new additional capacity to travel more Induced mobility is a hotly debated issue but the experts are no longer in any doubt that it is a very real phenomenon However measuring it is another matter since we do not have sufficient data or experience in this area This Round Table presents the data that is available to date on infrastructure induced mobility From the introductory reports and discussions it is clear that much progress has been made in the last few years As recently as ten years ago many experts would have disputed the very existence of the induced mobility phenomenon Today a consensus is emerging Round Table 105 gives the full report *Mitchell Electronic Fuel Injection*, 1995

Geography and Religious Knowledge in the Medieval World Christoph Mauntel, 2021-06-08 In the medieval world geographical knowledge was influenced by religious ideas and beliefs Whereas this point is well analysed for the Latin Christian world the religious character of the Arabic Islamic geographic tradition has not yet been scrutinised in detail This volume addresses this desideratum and combines case studies from both traditions of geographic thinking The contributions comprise in depth analyses of individual geographical works as for example those of al Idrisi or Lambert of Saint Omer different forms of presenting geographical knowledge such as TO diagrams or globes as well as performative aspects of studying and meditating geographical knowledge Focussing on texts as well as on maps the contributions open up a comparative perspective on how religious knowledge influenced the way the world and its geography were perceived and described into the medieval world

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2013-11-11

The Encyclopaedia fills a gap in both the history of science and in cultural studies. Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works. The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures' science. Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas. The Western academic divisions of science, technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected. This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity. The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today. There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does.

PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa. **The Soul in the Axiosphere from an Intercultural Perspective, Volume Two**

Joanna Jurewicz, Ewa Masłowska, Dorota Pazio-Wlazłowska, 2020-05-04 This volume gathers together a broad spectrum of evaluations of the soul from different perspectives including artistic, from literature and the arts, mystic and theological reflections on spirituality from the Christian religion as well as from the Orient and Ancient Egypt. The contributions in this book will afford the reader a wider perspective on the concept of the soul in its ethical, emotional and theological dimensions in both European and Non-European cultures and languages and in artistic, philosophical and religious texts.
