Graphics Recognition. Recent Advances and Perspectives

Josep Lladós, Young-Bin Kwon, 2004-10-14 1 This book contains refereed and improved papers presented at the 5th IAPR International Workshop on Graphics Recognition GREC 2003 GREC 2003 was held in the Computer Vision Center in Barcelona Spain during July 30 31 2003 The GREC workshop is the main activity of the IAPR TC10 the Technical 2 Committee on Graphics Recognition Edited volumes from the previous two shops in the series are available as Lecture Notes in Computer Science LNCS Volume 1072 GREC 1995 at Penn State University USA LNCS Volume 1389 GREC 1997 in Nancy France LNCS Volume 1941 GREC 1999 in Jaipur India and LNCS Volume 2390 GREC 2001 in Kingston Canada Graphics recognition is a particular field in the domain of document analysis that combines pattern recognition and image processing techniques for the analysis of any kind of graphical information in documents either from paper or electronic formats Topics of interest for the graphics recognition community are vectorization symbol recognition analysis of graphic documents with a grammatical notation like electrical diagrams architectural plans engineering drawings musical scores maps etc graphics based information retrieval performance evaluation in graphics recognition and systems for graphics recognition

In addition to the classic objectives in recent years graphics recognition has faced up to new and promising perspectives some of them in conjunction with other academic scientific communities Examples of that are sketchy interfaces and on line graphics recognition in the framework of human computer interaction or query by graphic content for retrieval and browsing in large format graphic documents digital libraries and Web applications Thus the combination of classic challenges with new research interests gives the graphics recognition field an active scientific community with a promising future

Designing a Modern Skeleton Programming Framework for Parallel and Heterogeneous Systems

August Ernstsson, 2020-10-21 Today s society is increasingly software driven and dependent on powerful computer technology Therefore it is important that advancements in the low level processor hardware are made available for exploitation by a growing number of programmers of differing skill level However as we are approaching the end of Moore s law hardware designers are finding new and increasingly complex ways to increase the accessible processor performance It is getting more and more difficult to effectively target these processing resources without expert knowledge in parallelization heterogeneous computation communication synchronization and so on To ensure that the software side can keep up advanced programming environments and frameworks are needed to bridge the widening gap between hardware and software One such example is the pattern centric skeleton programming model and in particular the SkePU project The work presented in this thesis first redesigns the SkePU framework based on modern C variadic template metaprogramming and state of the art compiler

technology It then explores new ways to improve performance by providing new patterns improving the data access locality of existing ones and using both static and dynamic knowledge about program flow The work combines novel ideas with practical evaluation of the approach on several applications The advancements also include the first skeleton API that allows variadic skeletons new data containers and finally an approach to make skeleton programming more customizable without compromising universal portability Implementation and Application of Functional Languages Marco T.

Morazán, Sven-Bodo Scholz, 2010-10-27 This book constitutes the thoroughly refereed post proceedings of the 21st International Workshop on Implementation and Applications of Functional Languages IFL 2000 held in South Orange NJ USA in September 2009 The 13 revised full papers presented were carefully reviewed and were selected from numerous submissions The IFL symposia bring together researchers and practitioners that are actively engaged in the implementation and the use of functional and function based programming languages Every year IFL provides a venue for the presentation and discussion of new ideas and concepts of work in progress and of publication ripe results **Intelligent Robotics and**
