Historical Perspectives

Maternity Nursing

- Childbirth is usually a normal, healthy event in the life of a family.
 - Childbirth affects the entire family, and family restructuring is required.
 - Families are capable of making decisions about care, provided they are given adequate information and professional support.
- Traditional hospital setting—labor, birth, recovery, and postpartum care occur in separate rooms; delay of parent-infant contact.
 - LDR rooms—labor, birth, and immediate recovery occur in a single room, with transfer to a postpartum room for continuing care; emphasis on keeping parents and infant together; liberal visiting.
 - LDRP rooms—same as LDR rooms except that mother and infant remain in the same room where birth occurred.
 - Birth centers—freestanding centers that provide antepartum, intrapartum, postpartum, and newborn care to low-risk mothers and babies; typically staffed by certified nurse-midwives.
 - Home births—birth occurs in a familiar setting with support people the mother wants; fewer nurse-midwives now attend these births because of malpractice insurance problems.

Current Trends in Maternity and Pediatric Care

- For maternity care, prospective payment plans have resulted in shortened length of stay after delivery. This created problems for some women and infants who required readmission following early discharge. Legislation now mandates length of stay following vaginal birth as 48 hours; following cesarean birth, length of stay is 4 days. Concerns about managed care in pediatrics include delay in treatment authorization and pediatric referrals and limited coordination with community health, education, and social services.

Author Michael Lechuga focuses on three arenas where a citizenship control assemblage manufactures alienhood: Hollywood extraterrestrial invasion film, federal antimigration and border security legislation, and various immigration enforcement protocols implemented along the Mexico-United States border. Building on rhetorical studies, settler colonial studies, and media studies, *Visions of Invasion* offers a glimpse at how the processes of alien-making contribute to an ongoing settler colonial project in the US. Lechuga demonstrates that popular films like *The War of the Worlds*, *Predator*, *Men in Black*, and more participate in the production of migrants as subjective terrorists, felons, and other noncitizen personae vilified in public discourse. Beyond just tracing how alien invasion narratives circulate in popular media, Lechuga describes how the logics motivating early US colonists materialize in both the US's citizenship control policy and in some of the country's most popular texts. Beneath each of the film franchises and antimigrant political expressions described in *Visions of Invasion* lies an anxious colonial logic in which the settler way of life is seemingly threatened by false narratives of imminent invasion from abroad. The volume offers a deep dive into how the rhetorical figure of the alien has been manufactured as a political subjectivity one that plays out the anxieties, guilts, and fears of colonialism in today's science-fiction landscape. **The Furniture dealers' and cabinet makers' guide** Furniture dealers' guide, 1793 [MotorBoating](#), 1981-07 **MotorBoating**, 1981-11 **Study Guide/outline to Accompany West's Business Law** Clarkson, Sally Clay, Kenneth W. The 6th edition contains chapters on court procedures, employment law, and comparative international law. A new feature, *Emerging Trends in Business Law*, emphasizes policy issues. Focus on Ethics appears at the end of each unit, and Ethical Considerations follow selected cases. Concept Summaries provide concise reviews of important material. Exhibits graphically illustrate important aspects of law. **Digital Culture and the U.S.-Mexico Border** Rubria Rocha de Luna, Maricruz Castro Ricalde, 2024-11-18 Conceptualizing how digital artifacts can function as a frontier mediated by technology in the geographical, physical, sensory, visual, discursive, and imaginary, this volume offers an interdisciplinary analysis of digital material circulating online in a way that creates a digital dimension of the Mexico-US border. In the

context of a world where digital media has helped to shape geopolitical borders and impacted human mobility in positive and negative ways the book explores new modes of expression in which identification memory representation persuasion and meaning making are created experienced and or circulated through digital technologies An interdisciplinary team of scholars looks at how quick communications bring closer transnational families and how online resources can be helpful for migrants but also at how digital media can serve to control and reinforce borders via digital technology used to create a system of political control that reinforces stereotypes The book deconstructs digital artifacts such as the digital press social media digital archives web platforms technological and artistic creations visual arts video games and artificial intelligence to help us understand the anti immigrant and dehumanizing discourse of control as well as the ways migrants create vernacular narratives as digital activism to break the stereotypes that afflict them This timely and insightful volume will interest scholars and students of digital media communication studies journalism migration and politics

Graham B. Slater, 2024-06-14 *Horizons of the Future Science Fiction Utopian Imagination and the Politics of Education* examines the relationship between science fiction education and social change in the 21st century. Global capitalism is ecologically unsustainable and ethically indefensible; time is running out to alter the course of history if humanity is to have hope of a livable future beyond the next century. However, alternatives are possible, offering much more equality, care, justice, joy, and hope than the established order. Popular culture and schools are key sites of struggles to imagine such alternatives. Drawing on critical theory, cultural studies, and sociology, Slater articulates the promising connection between science fiction and the future of education. He offers cutting-edge engagement with themes, perspectives, and modes of imagination in science fiction that can be mobilized politically and pedagogically to envision and enact critical forms of education that cultivate new utopian ways of relating to self, society, and the future. This thought-provoking book will be of interest to scholars and students in the social sciences and education.
