 MR Linac Presents the first book on MR Linac Radiotherapy Comprises both clinical and physical aspects of this new  
 technology Written by leading editors and authors in the field      Signal Processing and Machine Learning for Biomedical  
 Big Data Ervin Sejdic, Tiago H. Falk, 2018-07-04 Within the healthcare domain big data is defined as any high volume high  
 diversity biological clinical environmental and lifestyle information collected from single individuals to large cohorts in  
 relation to their health and wellness status at one or several time points Such data is crucial because within it lies vast  
 amounts of invaluable information that could potentially change a patient's life opening doors to alternate therapies drugs  
 and diagnostic tools Signal Processing and Machine Learning for Biomedical Big Data thus discusses modalities the  
 numerous ways in which this data is captured via sensors and various sample rates and dimensionalities Capturing analyzing  
 storing and visualizing such massive data has required new shifts in signal processing paradigms and new ways of combining  
 signal processing with machine learning tools This book covers several of these aspects in two ways firstly through  
 theoretical signal processing chapters where tools aimed at big data be it biomedical or otherwise are described and  
 secondly through application driven chapters focusing on existing applications of signal processing and machine learning for  
 big biomedical data This text aimed at the curious researcher working in the field as well as undergraduate and graduate  
 students eager to learn how signal processing can help with big data analysis It is the hope of Drs Sejdic and Falk that this  
 book will bring together signal processing and machine learning researchers to unlock existing bottlenecks within the  
 healthcare field thereby improving patient quality of life Provides an overview of recent state of the art signal processing and  
 machine learning algorithms for biomedical big data including applications in the neuroimaging cardiac retinal genomic  
 sleep patient outcome prediction critical care and rehabilitation domains Provides contributed chapters from world leaders in  
 the fields of big data and signal processing covering topics such as data quality data compression statistical and graph signal  
 processing techniques and deep learning and their applications within the biomedical sphere This book's material covers how

expert domain knowledge can be used to advance signal processing and machine learning for biomedical big data applications
