Analyze

- See Data Table.
- See Data Table.
- See Data Table. Sample Calculation for Pluso: e = 4/16 = 0.25
- 4. See Data Table.
- 5. Both foci are at the center.
- 6. It is very close to being a circle.
- The comet. It looks more flattened out then the other orbits.

Conclude and Apply

- Yes, the planets and comet travel in elliptical orbits.
- Since the eccentricity of Earth is so small, Kepler might not have concluded that planets have elliptical orbits.
- It travels fastest at perihelion. According to Kepler's second law, equal areas are swept out in equal time. Since there is less area available at perihelion, the planet must move faster.

4.
$$\frac{v_P}{v_A} = \frac{A}{P} = \frac{10.0}{6.0} = \frac{1.7}{1}$$

5. $v_A = \text{minimum velocity}$ = 3.7 km/s $v_P = 1.7 \times v_A$ = 1.7 × 3.7 km/s = 6.3 km/s

Going Further

- Collect data using dates of location of a planet. Use areas and dates to confirm the second law.
- In order to show the third law, a computer model would have a planet actually moving so that periods and distances could be measured.

Real-World Physics

Students can research elliptical orbits of satellites, Encourage the students to pick one or two satellites and, if possible, plot orbit data to determine the path that each satellite takes.

The basic principles of general relativity are then presented and the most important applications are discussed The final special topics section takes the reader up to a few areas of current research An extensive set of accessible problems enhances and extends the coverage As a learning and teaching tool this current book provides solutions to those problems This text and solutions manual are meant to provide an introduction to the subject It is hoped that these books will allow the reader to approach the more advanced texts and monographs as well as the continual influx of fascinating new experimental results with a deeper understanding and sense of appreciation Cognition in Education Jose Mestre, Brian H. Goettl, Henry M. Halff, Carol L. Redfield, Valerie J. Shute, 2003-06-29 The first International Conference on Intelligent Tutoring Systems ITS was held ten years ago in Montreal ITS 88 It was so well received by the international community that the organizers decided to do it again in Montreal four years later in 1992 and then again in 1996 ITS 98 differs from the previous ones in that this is the first time the conference has been held outside of Montreal and it s only been two years not four since the last one One interesting aspect of the ITS conferences is that they are not explicitly bound to some organization e g IEEE or AACE Rather the founder of these conferences Claude Frasson started them as a means to congregate researchers actively involved in the ITS field and provide a forum for presentation and debate of the most currently challenging issues Thus the unifying theme is science This year's hot topics differ from those in the earlier ITS conferences as they reflect ever changing trends in ITS research A few of the issues being examined at ITS 98 include Web based tutoring systems deploying ITS in the real world

publisher Multiple Solution Methods for Teaching Science in the Classroom Stephen DeMeo, 2008 For the first time in science education the subject of multiple solution methods is explored in book form While a multiple method teaching approach is utilized extensively in math education there are very few journal articles and no texts written on this topic in science Teaching multiple methods to science students in order to solve quantitative word problems is important for two reasons First it challenges the practice by teachers that one specific method should be used when solving problems Secondly it calls into question the belief that multiple methods would confuse students and retard their learning Using a case study approach and informed by research conducted by the author this book claims that providing students with a choice of methods as well as requiring additional methods as a way to validate results can be beneficial to student learning A close reading of the literature reveals that time spent on elucidating concepts rather than on algorithmic methodologies is a critical issue when trying to have students solve problems with understanding It is argued that conceptual understanding can be enhanced through the use of multiple methods in an environment where students can compare evaluate and verbally discuss competing methodologies through the facilitation of the instructor This book focuses on two very useful methods proportional reasoning PR and dimensional analysis DA These two methods are important because they can be used to solve a large number of problems in all of the four academic sciences biology chemistry physics and earth science This book concludes with a plan to integrate DA and PR into the academic science curriculum starting in late elementary school through to the introductory college level A challenge is presented to teachers as well as to textbook writers who rely on the single method paradigm to consider an alternative way to teach scientific problem solving Anxiety, Learning, and <u>Instruction</u> J. E. Sieber, H. F. O'Neil, Jr., S. Tobias, 2013-09-05 First published in 1977 Each of the authors independently initiated research to find ways of reducing the undesirable effects of anxiety 1 on intellectual performance The aim of this book is to summarize the research and ideas that have emerged from these programs It is both a progress report on the approaches we have developed for reducing anxiety or its undesirable effects and a means of sharing our insights concerning better ways of accomplishing these goals in the future
