Physics Memo 2014 Trial:

The History of Physics in Cuba Angelo Baracca,Jürgen Renn,Helge Wendt,2014-04-22 This book brings together a broad spectrum of authors both from inside and from outside Cuba who describe the development of Cuba s scientific system from the colonial period to the present It is a unique documentation of the self organizing power of a local scientific community engaged in scientific research on an international level The first part includes several contributions that reconstruct the different stages of the history of physics in Cuba from its beginnings in the late colonial era to the present The second part comprises testimonies of Cuban physicists who offer lively insights from the perspective of the actors themselves The third part presents a series of testimonies by foreign physicists some of whom were directly involved in developing Cuban physics in particular in the development of teaching and research activities in the early years of the Escuela de Física The fourth part of the volume deals with some of the issues surrounding the publishing of scientific research in Cuba Cuba s recent history and current situation are very controversial issues Little is known about the development and status of higher education and scientific research on the island However Cuba has one of the highest proportions in the world of people with a university degree or doctorate and is known for its highly developed medical system This book focuses on a comprehensive overview of the history of the development of one specific scientific discipline physics in Cuba It traces the evolution of an advanced research system in a developing country and shows a striking capacity to link the development of modern research with the concrete needs of the country and its population A little known aspect is the active participation of several western physicists and technicians during the 1960s the role of summer schools organized by French Italian and other western physicists as well as the active collaboration with European universities **Nuclear**

Science Abstracts ,1973 **Lung Cancer Screening** Gregory C. Kane,Julie A. Barta,Ronald E. Myers,Nathaniel R. Evans III,2023-08-24 This book is a comprehensive guide to lung cancer screening for clinicians healthcare systems community leaders and public health officials with the hope of creating a more equitable landscape in both lung cancer screening and lung cancer related outcomes at local state and national levels Authors take a new approach to primary and secondary lung cancer prevention that is in the early stages of adoption in the United States The last decade ushered in recognition of screening as an effective intervention but unfortunately despite the wide acceptance of the importance of this new screening modality nationally not more than 5% of eligible subjects have undergone screening to date in the United States although in some states uptake has reached as high as 16% As is common with any new preventive cancer screening racial and socioeconomic disparities emerge in utilization stage at diagnosis and mortality Over time these disparities decline but consequential differences endure Therefore it is critical to establish equitable screening practices The true measure of the effectiveness of any lung cancer screening program needs to be viewed through the lens of its impact on populations including those most affected by the morbidity and mortality of smoking related illness and lung cancer As such this book

emphasizes a number of important public health topics including community outreach to vulnerable populations social justice issues addressing stigma and fatalism in the general community and the use of geocoding to assess a program s impact at a population level This book weaves traditional topics related to lung cancer screening such as promoting initial and repeat screening interpreting Lung RADs and managing the follow up of findings into the population perspective in order to present a unified comprehensive approach to the subject Further it serves as a guide that health systems health care professionals community leaders and other stakeholders can use to achieve the promise of lung cancer screening Let There Be Light! Robert S. Dutch,2017-06-16 Have you ever wondered what it is like to work on a nuclear power plant Robert Dutch worked in the UK s nuclear industry for many years as a scientist and then as a tutor at a nuclear training center He also holds degrees in theology Drawing upon his qualifications and experience Robert addresses the controversial issue of nuclear power from a Christian perspective In contrast to a negative nuclear narrative often portrayed he presents a positive nuclear narrative alongside other ways of generating electricity Be prepared to be challenged to think seriously about nuclear s merits in providing clean low carbon electricity Trial by Fire Charles E. Gannon,2014-07-16 Sequel to national bestseller Nebula Award finalist and Compton Crook Award winner Fire with Fire Science fiction adventure on a grand scale When reluctant interstellar diplomat and intelligence operative Caine Riordan returns from humanity s first encounter with alien races sudden war clouds burst With Earth s fleet shattered by a sneak attack and its survivors fighting for their lives Caine must rely upon both his first contact and weaponry skills to contend with the non humanoid enemy And when the technologically superior attackers sweep aside the solar system s last defenses and traitorous corporations invite the invaders to land security forces humanity fights back with its best weapons cunning inventiveness and guts But as Earth hurtles towards a final trial by fire that is certain to scar its collective memory Caine discovers that there may also be large and disturbing gaps in that memory Clues point to a much earlier inter species apocalypse buried in humanity s own prehistory Which raises a terrifying possibility what if the aliens invasion of Earth is not one of conquest but preemption And what if their harrowing memories of a long past cataclysmic war makes them willing to do anything to keep it from reigniting Even if that means exterminating the human race At the publisher s request this title is sold without DRM Digital Rights Management About Compton Crook award winner for best first novel Fire with Fire _Chuck Gannon is one of those marvelous finds someone as comfortable with characters as he is with technology and equally adept at providing those characters with problems to solve Imaginative fun and not afraid to step on the occasional toe or gore the occasional sacred cow his stories do not disappoint David Weber If we meet strong aliens out there will we suffer the fate of the Aztecs and Incas or find the agility to survive Gannon fizzles with ideas about the dangerous politics of first contact David Brin The plot is intriguing and then some Well developed and self consistent intelligent readers are going to like it Jerry Pournelle T he intersecting plot threads action and well conceived science kept those pages turning SF Crowsnest About Starfire series hit Extremis coauthored by Charles E

Gannon _Vivid Battle sequences mingle with thought provoking exegesis _Publishers Weekly It s a grand fun series of battles and campaigns worthy of anything Dale Brown or Larry Bond ever wrote _Analog About Charles E Gannon A strong writer of military SF much action going on in his work with a lot of physics behind it There is a real sense of the urgency of war and the sacrifices it demands _Locus

The Psychology and Sociology of Wrongful Convictions Wendy J Koen,C. Michael Bowers,2018-06-26 Wrongful convictions are the result of faulty or false scientific evidence in 50% of the cases Defense counsel is often at a great disadvantage in defending against evidence based on science Illusory Evidence The Psychology and Sociology of Wrongful Convictions is written for the non scientist to make complicated scientific information clear and concise enough for attorneys and judges to master This is obtained by providing case studies to simplify issues in forensic psychology for the legal professional Increases the courts knowledge about areas of psychology that have been debunked have advanced or have been refined by the scientific community Covers issues in psychological forensics namely Profiling Psychological Defenses Mitigation Eyewitness Testimony Identification Child Testimony Repressed Memories False Confessions and Moral Panic Trains prosecuting attorneys about the present state of the forensic psychology to avoid relying only on legal precedent and will not present flawed science to the court Provides defense attorneys the knowledge necessary to competently defend where forensic psychology plays a part in a prosecution Arms innocence projects and appellate attorneys with the latest information to challenge convictions Uses case studies to simplify issues in forensic psychology for the legal professional

Don't Tell the Boss! Dmitry Chernov,Didier Sornette,Giovanni Sansavini,Ali Ayoub,2023-01-20 After a major disaster when investigators are piecing together the story of what happened a striking fact often emerges before disaster struck some people in the organization involved were aware of dangerous conditions that had the potential to escalate to a critical level But for a variety of reasons this crucial information did not reach decision makers So the organization moved ever closer to catastrophe effectively unaware of the possible threat despite the fact that some of its employees could see it coming What is the problem with communication about risk in an organization and why does this problem exist What stops people in organizations or project teams from freely reporting and discussing critical risks This book seeks to answer these questions starting from a deep analysis of 20 disasters where the concealment of risks played a major part These case studies are drawn from around the world and span a range of industries civil nuclear power coal oil

and gas production hydropower energy metals and mining space exploration transport finance retail manufacturing and even the response of governments to wars famines and epidemics Together case studies give an insight into why people hesitate to report risks and even when they do why their superiors often prefer to ignore the news The book reviews existing research on the challenges of voice and silence in organizations This helps to explain more generally why people dread passing on bad news to others and why in the workplace they prefer to keep quiet about unpleasant facts or potential risks when they are talking to superiors and colleagues The discussion section of the book includes important examples of concealment within the Chinese state hierarchy as well as by leading epidemiologists and governments in the West during the novel coronavirus outbreak in Wuhan in 2019 2020 The full picture of the very early stage of the COVID 19 pandemic remains unclear and further research is obviously needed to better understand what motivated some municipal provincial and national officials in China as well as Western counterparts to obfuscate facts in their internal communications about many issues associated with the outbreak

Every American an Innovator Matthew Wisnioski, 2025-05-13 A landmark cultural history that reveals how the relentless pursuit of innovation has transformed our society our institutions and our inner selves For half a century innovation served as a universal good in an age of fracture That consensus is cracking While the imperative to innovate for a better future continues to fuel systemic change around the world critics now assail innovation culture as an engine of inequality or accuse its do gooders of woke groupthink What happened Drawing on a decade of research *Every American an Innovator* by Matthew Wisnioski investigates how innovation a once obscure academic term became ingrained in our institutions our education and our beliefs about ourselves Wisnioski argues that innovation culture did not spring from the digital revolution nor can it be boiled down to heroic entrepreneurs or villainous capitalists Instead he reveals the central role of a new class of experts in spreading toolkits and mindsets from the cornfields of 1940s Iowa to Silicon Valley tech giants today This group of engineers philosophers bureaucrats and business leaders posited that innovators were society's most important change agents and remade the nation in their image The innovation culture they built transcended partisan divisions and made strange bedfellows Wisnioski shows how Kennedy era policymakers inspired President Nixon's dream of a Nobel Prize for innovators how anti military professors built the first university incubators for entrepreneurs how radical feminists became millionaire consultants how demands for a rust belt manufacturing renaissance inspired theories of a global creative class how programs that encouraged girls and minority children to pursue innovative lives changed the nature of childhood play and why the innovation consensus is now in dispute

Technology and Science for the Ships of the Future A. Marinò, V. Bucci, 2018-06-22 In 1974 a scientific conference covering marine automation group and large vessels issues was organized under the patronage of the Technical Naval Studies Centre CETENA and the Italian National Research Council CNR A later collaboration with the Marine Technical Association ATENA led to the renaming of the conference as NAV extending the topics covered to the technical field previously covered by ATENA national conferences The NAV conference is

now held every 3 years and attracts specialists from all over the world This book presents the proceedings of NAV 2018 held in Trieste Italy in June 2018 The book contains 70 scientific papers 35 technical papers and 16 reviews and subjects covered include comfort on board conceptual and practical ship design deep sea mining and marine robotics protection of the environment renewable marine energy design and engineering of offshore vessels digitalization unmanned vehicles and cyber security yacht and pleasure craft design and inland waterway vessels With its comprehensive coverage of scientific and technical maritime issues the book will be of interest to all those involved in this important industry Scientific and Technical Aerospace Reports ,1991 *Yearbook of International Organizations 2013-2014 (Volumes 1a-1b)* Union Of International Associations,Union of International Associations,2013-06-21 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events **United States Army in World War 2, Special Studies, Manhattan, the Army, and the Atomic Bomb (Clothbound)** ,2014-07-29 he U S Army played a key role in the formation and administration of the Manhattan Project the World War II organization which produced the atomic bombs that not only contributed decisively to ending the war with Japan but also opened the way to a new atomic age The volume begins with a prologue designed to provide the reader with a brief survey of the history of atomic energy and to explain in layman s terms certain technical aspects of atomic science essential to an understanding of the major problems occurring in the development of an atomic weapon Early chapters describe the beginning of the Army s atomic mission including the formation of the Manhattan District the first steps in acquiring the means to produce atomic weapons and the appointment of General Groves Subsequent topical chapters trace the building and operation of the large scale process plants for the production of fissionable materials the administration of a broad range of support activities such as security and community management and the fabrication testing and combat employment of atomic bombs A concluding section describes how the Army dealt with the difficult problems arising during its unexpectedly prolonged postwar trusteeship of the project until December 1946 when the newly created civilian agency the United States Atomic Energy Commission assumed responsibility for atomic energy matters Resources in Education ,1998 Innovation and Adaptation in War Matthew A. Tattar,2025-05-20 An analysis of advances in military technology that illustrates the importance of organizational flexibility in both an attacker s innovations and an opponent s adaptations How important is military innovation in determining outcomes during armed conflict In Innovation and Adaptation in War Matthew Tattar questions the conventional wisdom that to succeed military organizations must innovate early and often Because successful methods of warfare are soon widely imitated or countered on the international stage the advantages of a particular innovation quickly evaporate Therefore Tattar argues large scale innovations at the cost of organizational flexibility and the ability to adapt to an adversary s innovations may not be the optimal path not just because force readiness is vital but also because innovation does not provide as long lasting and decisive an advantage as may have been previously thought Although other scholars have analyzed the

sources of military innovation Tattar is the first to focus on the relationship between innovation and specific military outcomes Looking at several different types of military organizations and many different types of battles he draws on theoretical works in depth historical research and case studies and finds that the initial advantages that are generated by innovation disappear far too rapidly in wartime for militaries to depend on them for victory Furthermore as Tattar demonstrates emphasizing innovation in defense planning at the expense of organizational flexibility can have significant negative consequences The decisive factor in successful adaptation more often than not is a well positioned and flexible organization Providing both a new framework for studying military innovation and a comprehensive review of the current literature in this field Innovation and Adaptation in War offers crucial policymaking insights into when and under what circumstances militaries should innovate and adapt
