Teach Me to Be Generous Anthony D. Andreassi, 2014-03-03 Teach Me to Be Generous tells the remarkable story of Regis High School the Jesuit school on New York's Upper East Side that was founded in 1914 by an anonymous donor as a school for Catholic boys whose families could not otherwise afford a Catholic education Enabled by the philanthropy of the founding family for nearly a century and now by alumni and friends carrying on that tradition of generosity Regis has been able to provide tuition free all scholarship education for its entire history It also holds the distinction of being the first free standing Jesuit high school in the United States with no connection to any Jesuit colleges or universities Regis High School's unique story is told by an engaging storyteller and historian who has taught at the school for more than ten years Father Andreassi offers captivating glimpses into the lives and daily experiences of Regis's students and faculty while chronicling the development of the school's educational philosophy and spiritual approach in its first century Filled with entertaining anecdotes alongside wider historical context and illuminating statistical analysis Teach Me to Be Generous tracks Regis High School through the decades of the twentieth century to the present day from the generosity of a devout Catholic widow through the Depression and World War II to changes in demographics of the Catholic community and shifts in the landscape of Catholic education in New York City During the school's first few decades Regis admitted thousands of Catholic boys mostly from poor or lower middle class families helping prepare them for success in college and leadership positions in the professions Because of the closing of dozens of urban Catholic schools and the general decline of the quality of New York City's public schools in more recent years the school has faced the challenge of remaining true to its mission in offering an education to Catholic boys who otherwise would not be able to afford a Catholic education Teach Me to Be Generous paints a vivid portrait of the first one hundred years of an exceptional institution and looks with hope and confidence to its future

**Cancer, Radiation Therapy, and the Market** Barbara Bridgman Perkins, 2017-08-16

Appraising cancer as a major medical market in the 2010s Wall Street investors placed their bets on single technology treatment facilities costing 100 300 million each Critics inside medicine called the widely publicized proton center boom crazy medicine and unsustainable public policy There was no valid evidence they claimed that proton beams were more effective than less costly alternatives But developers expected insurance to cover their centers staggeringly high costs and debts Was speculation like this new to health care Cancer Radiation Therapy and the Market shows how the radiation therapy specialty in the United States later called radiation oncology coevolved with its device industry throughout the twentieth century Academic engineers and physicians acquired financing to develop increasingly powerful radiation devices initiated companies to manufacture the devices competitively and designed hospital and freestanding procedure units to utilize them In the process they incorporated market strategies into medical organization and practice Although palliative

benefits and striking tumor reductions fueled hopes of curing cancer scientific research all too often found serious patient harm and disappointing beneficial impact on cancer survival This thoroughly documented and provocative inquiry concludes that public health policy needs to re evaluate market driven high tech medicine and build evidence based health care systems

**Daily Graphic** Henry Ofori,1969-03-15 *The British Battleship 1906-1946* Norman Friedman,2015-09-30 The British battleship is one of the most intensely studied of all naval topics but it is also among the most popular Norman Friedman is one of the most highly regarded of all naval writers with an avid following for his work Therefore a new book on British battleships by Friedman is a major event and has been eagerly awaited ever since knowledge of the project began to circulate among enthusiasts Friedman has the ability to bring new ideas to even the most over worked subjects based on extensive original research and a talent for explaining technology in the wider context of politics economics and strategy His latest book covers the development of Royal Navy capital ships including battlecruisers from the pre history of the revolutionary Dreadnought of 1906 to the last of the line HMS Vanguard in 1946 Replete with original insights the story that emerges will enlighten and surprise even the most knowledgeable The attraction of the book is enhanced by sets of specially commissioned plans of the important classes by John Roberts and A D Baker III both renowned experts in their own right plus a colour section featuring the original Admiralty draughts including a spectacular double gatefold For many with an interest in warships this will be the book of the year *Scientific and Technical Aerospace Reports* ,1992 **Introduction to**

**Biosocial Medicine** Donald A. Barr,2016-01-15 Understanding human behavior is essential if medical students and doctors are to provide more effective health care While 40 percent of premature deaths in the United States can be attributed to such dangerous behaviors as smoking overeating inactivity and drug or alcohol use medical education has generally failed to address how these behaviors are influenced by social forces This new textbook from Dr Donald A Barr was designed in response to the growing recognition that physicians need to understand the biosocial sciences behind human behavior in order to be effective practitioners Introduction to Biosocial Medicine explains the determinants of human behavior and the overwhelming impact of behavior on health Drawing on both recent and historical research the book combines the study of the biology of humans with the social and psychological aspects of human behavior Dr Barr a sociologist as well as physician illustrates how the biology of neurons the intricacies of the human mind and the power of broad social forces all influence individual perceptions and responses Addressing the enormous potential of interventions from medical and public health professionals to alter these patterns of human behavior over time Introduction to Biosocial Medicine brings necessary depth and perspective to medical training and education *Investigating Light and Shadow with Young Children (Ages 3-8)* Beth Dykstra Van Meeteren,2022-06-17 Children are intrigued by switches that power a light source and by items that reflect light and sparkle and they take notice of personal shadows cast on the playground An understanding of light and shadow is crucial to many STEM fields including astronomy biology engineering architecture and more This book shows teachers how to

engage children ages 3-8 with light and shadow in a playful way building an early foundation for the later more complex study of this phenomena and ultimately for children's interest in professions within the STEM fields The text offers guidance for arranging the physical environment of classrooms integrating literacy learning and investigations and building partnerships with administrators Each volume in the STEM for Our Youngest Learners Series includes examples of educators and children engaging in inquiry learning guidance for selecting materials and arranging the learning environment modifications and accommodations for diverse learners support for establishing adult learning communities and more
